

New Energy LEDiL Optics Kit (NELOK)

NELOK1-C32-01-00

Version 1.1

Lean & Fast. Made Smarter.

The New Energy LEDiL Optics Kit is designed to allow lighting professionals, product designers, and lighting enthusiasts to explore LEDiL's expansive line of single-lens solutions that can be used in conjunction with individual LEDs. Users of this kit will be able to explore the many secondary optical distributions available to them through LEDiL's precision molded lens assemblies.

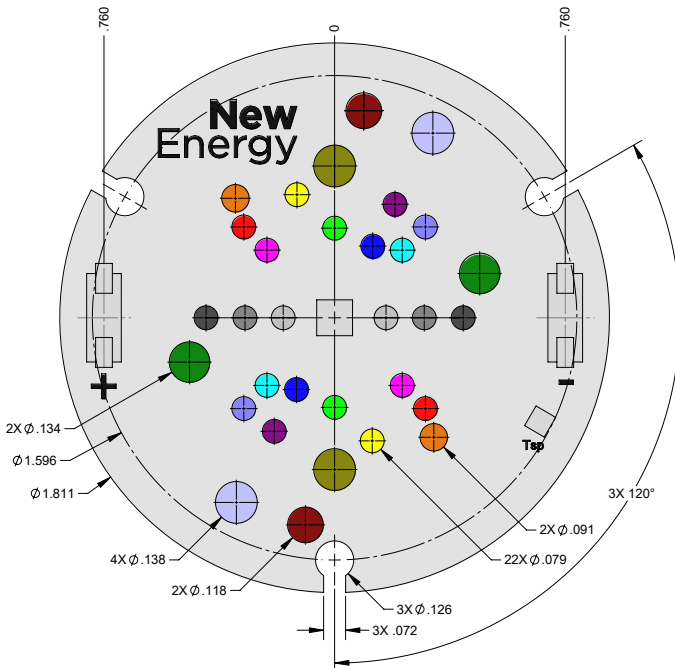

Assembly Instructions

- Connect wire harness to the LED board BEFORE connecting to a live power source
- Wires connect Red to positive and Black to negative
- Attach LEDiL Optic
- Recommended Test Current: 15mA @ 3V
- Maximum current: 1500mA @ 3V
- Full instruction sheet included with module
- Power supply not included
- NELOK is designed for engineering development purposes only, not intended to be used as final luminaire
