EZConnect[™] (NN01-105) - Zigbee, RFID and ISM 868/915 (868 MHz, 902 – 928 MHz)

Ignion specializes in enabling effective mobile communications. Using Ignion technology, we design and manufacture optimized antennas to make your wireless devices more competitive. Our mission is to help our clients develop innovative products and accelerate their time to market through our expertise in antenna design, testing and manufacturing.

The EZConnect[™] Zigbee Chip Antenna is a compact rectangular antenna suitable for smart home, security and other industrial devices using the 915 MHz ISM band, where low power consumption and cost are top of mind. The EZConnect[™] antenna is built on glass epoxy substrate. Taking advantage of the space-filling properties, this compact monopole antenna is ideal for use within indoor (highly scattered) as well as outdoor environments.

The EZConnect[™] Zigbee Chip Antenna speeds your time to market by allowing you to easily integrate it within your industrial design (SMD mounting).

Product Benefits

- **Small form factor**
Allows integration into space limited areas easily and efficiently.
- **Broad bandwidth**
Ensures robust performance in different PCB dimensions and plastic housing, without the need for a matching network.
- **Omnidirectional pattern**
Increases device robustness due to a uniform radiation pattern.
- **High performance**
Optimizes power consumption and increases device range.
