

Photologic® Sensor

OPL530, OPL531, OPL535, OPL536, OPL550, OPL551, OPL560, OPL561, OPL562, OPL563

Features:

- Choice of four output options in low-cost side-looking package
- Choice of two sensitivity options (OPL560/561/562/563)
- High noise immunity
- Direct TTL/LSTTL CMOS interface
- Data rates to 250 kBaud for all except OPL560 series (200 kBaud)
- Low power consumption

Description:

All components in this series include a photodiode, amplifier, voltage regulator, Schmitt trigger and NPN output transistor on a single silicon chip. **OPL560** chips also include a voltage regulator on the chip. All devices in the series have a Photologic® chip that is encapsulated in a molded plastic side-looking package with an integral lens (recessed integral lens for OPL535 and OPL536). This packaging provides enhanced optical coupling, combined with mechanical protection. The hysteresis characteristics of the Schmitt trigger on each device offers high immunity to noise on input and V_{CC} .

OPL530, OPL531, OPL535 and **OPL536** include a 10 K Ω pull-up resistor (R_L) from output to V_{CC} . These components exhibit very stable performance over supply voltages ranging from 4.5 V to 16 V and a wide range of irradiance levels. **OPL550** and **OPL551** devices feature TTL/LSTTL compatible logic level output which can drive up to 8 TTL loads without additional circuitry and medium-speed data rates to 250 kBaud, with typical rise and fall times of 25 nanoseconds. **OPL560, OPL561, OPL562** and **OPL563** devices feature TTL/LSTTL compatible logic level output which can drive up to 10 TTL loads over supply voltages ranging from 4.5 V to 16 V.

OPL530, OPL531, OPL550, OPL551, OPL560, OPL561, OPL562 and **OPL563** are mechanically and spectrally matched to OP140 and OP240 LEDs. **OPL535** and **OPL536** are mechanically and spectrally matched to OP145 and OP245 series LEDs.

Applications:

- Non-contact reflective object sensor
- Assembly line automation
- Machine automation
- Machine safety
- End of travel sensor
- Door sensor

Base Part Number	Package	Output Type - with Light	Input Power Range (mW/cm ²) [Min/Max]

Notes:

- (1) RMA flux is recommended. Duration can be extended to 10 sec. max. when flow soldering. For OPL530, OPL530-OC, OPL531A, OPL531-OCA, OPL535A, OPL535B, and OPL536A a maximum of 20 grams force may be applied to leads while at soldering temperatures.
- (2) Derate linearly 2.67 mW/° C above 70° C for OPL530, OPL530-OC, OPL531A, OPL531-OC, OPL535A/B, and OPL536A. Derate linearly 2.5 mW/° C above 25° C for all devices in the OPL550, OPL551, OPL560, OPL561, OPL562 and OPL563 series.
- (3) Irradiance measurements are made with $\lambda_i = 935\text{ nm}$.
- (4) This applies to OC versions only. For I_{CC} on pull-up versions, add $V_{CC}/10\text{ K}\Omega$.

General Note

TT Electronics reserves the right to make changes in product specification without notice or liability. All information is subject to TT Electronics' own data and is considered accurate at time of going to print.
