### General Description

The Oscar 18 is a plastic enclosed Yagi-directional wall / bracket mount antenna and a great solution covering many popular frequencies in use today. Its radome is UV and water resistant making it a great outdoor antenna.

Its Yagi design provides superior performance for cellular applications in rural areas where signal reception is particularly low.

The radiating element from this Yagi antenna performs in a directional manner, producing a peak gain of 8 dBi to maximise signal transmission and reception. It is supplied with a bracket for wall or pole mounting.

Typical applications include Train-to Ground Rail applications, Precision Agriculture, Smart Grid Implementation and signal strength enhancement for real time tracking of public transport systems.

**NOTE:** For each frequency band, Siretta provides a traffic light indication to show the suitability of the antenna for use at that frequency band. Determination of exactly what makes an antenna good or bad at any frequency is subjective.

The view presented is that of Siretta's engineering team having taken into account the efficiency and VSWR measurements. The end user is advised to use their own criteria and/or testing to confirm suitability.
