

Oscar 20

2G/GPRS, 3G/UMTS, 4G/LTE Yagi Antenna

Key Features

- 7-8dB gain
- Small size
- Highly sensitive

General Description

The Oscar 20 antenna is a high gain, quad band 2G/3G and 4G antenna for connectivity in remote environments where a point to point link is the only effective method of communication between equipment and single cell site.

Designed for indoor or outdoor environments the antenna is supplied with a hinged mounting bracket and 5 metres of cable with an SMA male termination.

Cable assemblies are available in different lengths and connector types, see website for details.

Additional Considerations

- High performance for fringe coverage areas
- Includes bracket mount
- Suitable for both indoor and outdoor use
- Meets all EU compliance criteria for electronic goods
