

Oscar 421

2G/3G/4G/WiFi MIMO directional Antenna

Key Features

- Weather and UV Resistant
- MIMO Directional Antenna
- 9dBi Peak Gain

General Description

The Oscar 421 is an excellent panel antenna covering many popular frequencies in use today. Its radome is UV and water resistant making it a great outdoor antenna.

Ideal for use in sports arenas and shopping malls to provide either telephone or WiFi network access services. Fitted with 0.4M RG58 tails ready for connection to standard or low loss cable for extended distance to the Transmitter/Receiver.

The flat panel design pushes out the signal in one direction enabling a higher directional gain to be achieved.

The Oscar 421 comes with a stainless steel bracket and U bolt clamp for standard mast mounting.

Additional Considerations

- Wide coverage of frequencies
- Can be connected to standard or low loss cable
