Description

This MC Series (Pxxx2ACMC) offered in a modified TO-220 package are low capacitance SIDACtor components designed to protect various types of Broadband equipment from damaging overvoltage transients.

The series provides a robust single port solution that enables equipment to comply with various global regulatory standards while limiting the impact to broadband signals.

Features and Benefits

- Low voltage overshoot
- Low on-state voltage
- Does not degrade surge capability after multiple surge events within limit.
- Fails short circuit when surged in excess of ratings
- Robust Modified TO-220 Package
- Custom lead forms available
- 40% lower capacitance
- than our Baseband Protectors, for applications that demand greater signal integrity
- Pb-free E3 means 2nd level interconnect is Pb-free and the terminal finish material is tin(Sn) (IPC/JEDEC J-STD-609A.01)
- Halogen-free and RoHS compliant
- Recognized to UL 497B as an Isolated Loop Circuit Protector
