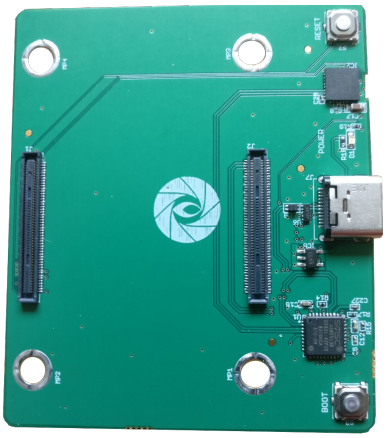
Gumstix Raspberry Pi CM4 FastFlash
Product datasheet

PKG900000001452 *USD50.00*



The FastFlash expansion board, designed specifically for the Raspberry Pi CM4 (not included), is a cost-effective device that allows you to initialize or overwrite the Pi Compute Module embedded storage with a new disk image, or mount the file system to your PC. The board is powered from a USB-C connector. The single USB-C connection provides flashing capabilities as well as a serial console.

RASPBERRY PI COMPUTE MODULE 4 IS NOT INCLUDED.

Mating connector

2 × Stacking Board Connector, DF40 Series, Receptacle, 0.4 mm, 100, Surface Mount

What's included

1 × Gumstix Raspberry Pi CM4 FastFlash

Key component

1 × USB Type-C Port

1 × FTDI FT232RQ USB UART Interface
