## 1. Setting Up the Intel FPGA Download Cable II

#### Attention:

The download cable has changed name to  $Intel^{\circledR}$  FPGA download cable II. Some file names may still refer to USB-Blaster II.

The Intel FPGA download cable II interfaces a USB port on a host computer to an Intel FPGA mounted on a printed circuit board. The download cable sends data from the PC to a standard 10-pin header connected to the FPGA. You can use the cable for the following:

- Iteratively download configuration data to a system during prototyping
- Program data into the system during production
- · Advanced Encryption Standard (AES) key and fuse programming

#### 1.1. Supported Devices and Systems

You can use the cable to download configuration data to the following devices:

- Stratix<sup>®</sup> series FPGAs
- Cyclone<sup>®</sup> series FPGAs
- MAX<sup>®</sup> series CPLDs
- Arria® series FPGAs

You can perform in-system programming of the following devices:

- EPC4, EPC8, and EPC16 enhanced configuration devices
- EPCS1, EPCS4, EPCS16, EPCS64, and EPCS/Q128, EPCQ256, EPCQ-L and EPCQ512 serial configuration devices

The cable supports target systems using the following:

- 5.0-V TTL, 3.3-V LVTTL/LVCMOS
- Single-ended I/O standards from 1.5 V to 3.3 V

#### 1.2. Power Source Requirements

- 5.0 V from the cable
- Between 1.5 V and 5.0 V from the target circuit board

#### 1.3. Software Requirements and Support

- Windows 7/8 (32-bit and 64-bit)
- Windows XP (32-bit and 64-bit)
- Windows Server 2008 R2 (64-bit)
- Linux platforms such as Red Hat Enterprise 5

Use the Quartus<sup>®</sup> Prime software version 14.0 or later to configure your device.

Note:

Quartus Prime software version 13.1 supports most of the download cable's capabilities. If you use this version, install the latest patch for full compatibility.

The download cable also supports the following tools:

- Quartus Prime Programmer (and stand-alone version)
- Quartus Prime SignalTap® II Logic Analyzer (and stand-alone version)
- JTAG and debug tools supported by the JTAG Server. For example:
  - System Console
  - Nios II debugger
  - ARM DS-5 debugger

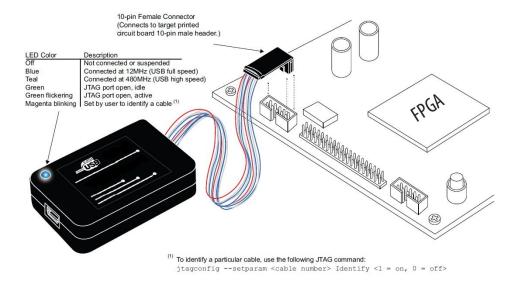

# **1.4. Installing the Intel FPGA Download Cable II for Configuration or Programming**

- 1. Disconnect the power cable from the circuit board.
- Connect the cable to the USB port on your computer and to the download cable port.
- 3. Connect the cable to the 10-pin header on the device board.
- 4. Reconnect the power cable to reapply power to the circuit board.

Figure 1. The Intel FPGA Download Cable II

Note: For plug and header dimensions, pin names, and operating conditions, see the Intel FPGA Download Cable II Specifications chapter.

#### **Related Information**

Intel FPGA Download Cable II Specifications on page 8

# 1.5. Installing the Intel FPGA Download Cable II Driver on Windows 7/8 Systems

You must have system administration (administrator) privileges to install the download cable drivers.

The download cable drivers are included in the Quartus Prime software installation. Before you begin the installation, verify that the download cable driver is located in your directory: \< Quartus Prime system directory > \drivers\usb-blaster-ii.

- Connect the download cable to your computer's USB port.
   When plugged in for the first time, a message appears stating **Device driver software was not successfully installed**.
- From the Windows Device Manager, locate Other devices and right-click the top USB-BlasterII.

You need to install drivers for each interface: one for the JTAG interface and one for the System Console interface.

 On the right-click menu, click Update Driver Software. The Update Driver Software - USB BlasterII dialog appears.

UG-01150 | 2018.04.19

- 4. Click Browse my computer for driver software to continue.
- 5. Click **Browse...** and browse to the location of the driver on your system: \<\Quartus Prime system directory>\drivers\usb-blaster-ii. Click **OK**.
- 6. Click **Next** to install the driver.
- 7. Click **Install** when asked if you want to install.

You should now have a JTAG cable showing in the Device Manager.

8. Now, install the driver for the other interface. Go back to step 2 and repeat the process for the other download cable devices.

When you are finished, you will have added **USB-Blast II (JTAG interface)** under JTAG cables.

# 1.6. Installing the Intel FPGA Download Cable II Driver on Linux Systems

For Linux, the download cable supports Red Hat Enterprise 5, 6, and 7.

To access the cable, the Quartus Prime software uses the built-in Red Hat USB drivers, the USB file system (usbfs). By default, **root** is the only user allowed to use usbfs. You must have system administration (root) privileges to configure the Intel FPGA download cable drivers.

- Create a file named /etc/udev/rules.d/51-usbblaster.rules and add the following lines to it. (The .rules file may already exist if you have installed an earlier USB-Blaster version.)
  - a. Red Hat Enterprise 5 and above

```
# Intel FPGA Download Cable II
SUBSYSTEMS=="usb", ATTRS{idVendor}=="09fb", ATTRS{idProduct}=="6010",
MODE="0666"
SUBSYSTEMS=="usb", ATTRS{idVendor}=="09fb", ATTRS{idProduct}=="6810",
MODE="0666"
```

Caution: There should be only three lines in this file, one starting with a comment and two starting with BUS. Do not add extra line breaks to the .rules file.

2. Complete your installation by setting up the programming hardware in the Quartus Prime software. Go to the "Setting Up the Intel FPGA Download Cable II Hardware with the Quartus Prime Software" section.

For more information about download cable driver installation, refer to the Cable and Adapter Drivers Information page.

# 1.7. Installing the Intel FPGA Download Cable II Driver on Windows XP Systems

You must have system administration (administrator) privileges to install the download cable driver.

The download cable drivers are included in the Quartus Prime software installation. Before you begin the installation, verify that the download cable driver is located in your directory: \< Quartus Prime system directory > \drivers\usb-blaster-ii.

# 1.8. Setting Up the Intel FPGA Download Cable II Hardware with the Quartus Prime Software

- 1. Start the Quartus Prime software.
- 2. From the Tools menu, click **Programmer**.
- 3. Click Hardware Setup.
- 4. Click the **Hardware Settings** tab.
- From the Currently selected hardware list, select Intel FPGA Download Cable II.
- 6. Click Close.
- 7. In the **Mode** list, choose an appropriate programming mode. The table below describes each mode.

#### Table 1. Programming Modes

Mode	Mode Description
Joint Test Action Group (JTAG)	Programs or configures all devices supported by Quartus Prime software via JTAG programming.
In-Socket Programming	Not supported by the download cable.
Passive Serial Programming	Configures all devices supported by Quartus Prime software excluding enhanced configuration devices (EPC) and serial configuration devices (EPCS/Q).
Active Serial Programming	Programs a single EPCS1, EPCS4, EPCS16, EPCS64, EPCS/Q128, EPCQ256, EPCQ-L and EPCQ512 device.

For detailed help on using the Quartus Prime Programmer, refer to the *Quartus Prime Handbook*.

# 2. Intel FPGA Download Cable II Specifications

### 2.1. Voltage Requirements

The download cable  $V_{CC(TRGT)}$  pin must be connected to a specific voltage for the device being programmed. Connect pull-up resistors to the same power supply as the download cable:  $V_{CC(TRGT)}$ .

Table 2. Intel FPGA Download Cable II V<sub>CC(TRGT)</sub> Pin Voltage Requirements

<b>Device Family</b>	Intel FPGA Download Cable II VCC Voltage Required		
Arria GX	As specified by V <sub>CCSEL</sub>		
Arria II GX	As specified by V <sub>CCPD</sub> or V <sub>CCIO</sub> of Bank 8C		
Arria V	As specified by V <sub>CCPD</sub> Bank 3A		
Arria 10	As specified by V <sub>CCPGM</sub> or V <sub>CCIO</sub>		
Cyclone III	As specified by V <sub>CCA</sub> or V <sub>CCIO</sub>		
Cyclone IV	As specified by $V_{\text{CCIO}}$ . Bank 9 for Cyclone IV GX and Bank 1 for Cyclone IV E devices.		
Cyclone V	As specified by V <sub>CCPD</sub> Bank 3A		
EPC4, EPC8, EPC16	3.3 V		
EPCS1, EPCS4, EPCS16, EPCS64, EPCS128	3.3 V		
EPCS/Q16, EPCS/Q64, EPCS/Q128, EPCQ256, EPCQ512	3.3 V		
EPCQ-L	1.8 V		
MAX II, MAX V	As specified by V <sub>CCIO</sub> of Bank 1		
MAX 10	As specified by V <sub>CCIO</sub>		
Stratix II, Stratix II GX	As specified by V <sub>CCSEL</sub>		
Stratix III, Stratix IV	As specified by V <sub>CCPGM</sub> or V <sub>CCPD</sub>		
Stratix V	As specified by V <sub>CCPD</sub> Bank 3A		

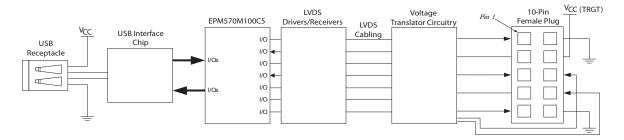

#### 2.2. Cable-to-Board Connection

A standard USB cable connects to the USB port on the device.

Intel Corporation. All rights reserved. Intel customers are advised to obtain the latest version of device specifications before relying on any published information and before placing orders for products or services.

Figure 2. Intel FPGA Download Cable II Block Diagram

# 2.3. Intel FPGA Download Cable II Plug Connection

The 10-pin female plug connects to a 10-pin male header on the circuit board containing the target device.

Figure 3. Intel FPGA Download Cable II 10-Pin Female Plug Dimensions - Inches & Millimeters

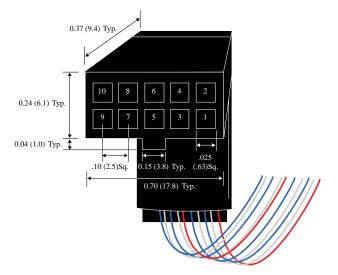

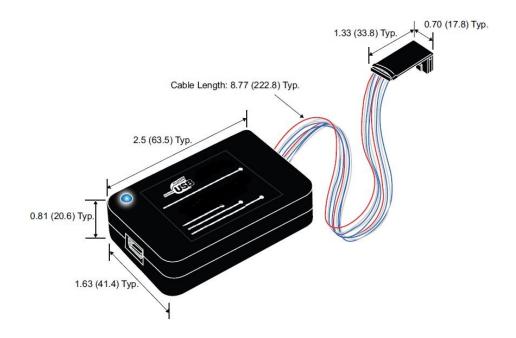

Figure 4. Intel FPGA Download Cable II Dimension - Inches and Millimeters

# 2.4. 10-Pin Female Plug Signal Names and Programming Modes

Table 3. 10-Pin II Female Plug Signal Names and Programming Modes

Pin	in Active Serial (AS) Mode		Passive Seria	l (PS) Mode	JTAG	Mode
	Signal Name	Description	Signal Name	Description	Signal Name	Description
1	DCLK	Configuration Clock	DCLK	Configuration Clock	TCK	Test Clock
2	GND	Signal ground	GND	Signal ground	GND	Signal ground
3	CONF_DONE	Configuration done	CONF_DONE	Configuration done	TDO	Test Data Output
4	VCC(TRGT)	Target power supply	VCC(TRGT)	Target power supply	VCC(TRGT)	Target power supply
5	nCONFIG	Configuration control	nCONFIG	Configuration control	TMS	Test Mode Select Input
6	nCE	Target chip enable	-	-	PROC_RST	Processor Reset
7	DATAOUT	Active serial data out	nSTATUS	Configuration Status	-	-
8	nCS	Serial configuration device chip select	nCS	Serial configuration device chip select	-	-
9	ASDI	Active serial data in	DATA0	Passive serial data in	TDI	Test Data Input
10	GND	Signal ground	GND	Signal ground	GND	Signal ground

UG-01150 | 2018.04.19

*Note:* Use pin 6 for hard processor reset under JTAG mode.

Note: The following note below only applies to Intel Arria 10 and earlier SoC devices.

PROC RST is not used for Intel Stratix 10 SoC devices.

In JTAG mode, the PROC\_RST pin can be used to trigger warm reset of the HPS block when prompted via the ARM DS-5 debugger. PROC\_RST is an active low signal and not an open collector pin. As such, it is not recommended to connect PROC\_RST to HPS\_nRST directly. You should instead connect this pin to a secondary device such as the MAX V CPLD, and use the device to manage the reset network for HPS.

#### 2.5. Circuit Board Header Connection

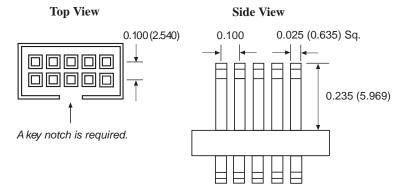

The 10-pin male header, which connects to the download cable's 10-pin female plug, has two rows of five pins. The pins are connected to the device's programming or configuration pins.

Caution: If the header connection on the circuit board is a male receptacle, it must have a key

notch. Without a key notch, the 10-pin female plug will not connect. The following

figure shows a typical 10-pin male header with a key notch.

Figure 5. 10-Pin Male Header Dimensions - Inches and Millimeters

Although a 10-pin surface mount header can be used for the cable, Intel recommends using a through-hole connector. Through-hole connectors hold up better under the repeated insertion and removal.

### 2.6. Operating Conditions

The following tables summarize the maximum ratings, recommended operating conditions, and DC operating conditions for the download cable.

Table 4. Intel FPGA Download Cable II Absolute Maximum Ratings

Symbol	Parameter	Conditions	Min	Max	Unit
V <sub>CC(TRGT)</sub>	Target supply voltage	With respect to ground	-0.5	6.5	V
V <sub>CC(USB)</sub>	USB supply voltage	With respect to ground	-0.5	6.0	V
continued			ued		

Symbol	Parameter	Conditions	Min	Max	Unit
II	Target side input current	Pin 7	-100.0	100.0	mA
I <sub>I(USB)</sub>	USB supply current	VBUS	-	200.0	mA
Io	Target side output current	Pins: 1, 5, 6, 8, 9	-50.0	50.0	mA

#### Table 5. Intel FPGA Download Cable II Recommended Operating Conditions

Symbol	Parameter	Conditions	Min	Max	Unit
V <sub>CC(TRGT)</sub>	Target supply voltage, 5.0-V operation	_	4.75	5.25	V
	Target supply voltage, 3.3-V operation	_	3.0	3.6	V
	Target supply voltage, 2.5-V operation	_	2.375	2.625	V
	Target supply voltage, 1.8-V operation	_	1.71	1.89	V
	Target supply voltage, 1.5-V operation	_	1.43	1.57	V

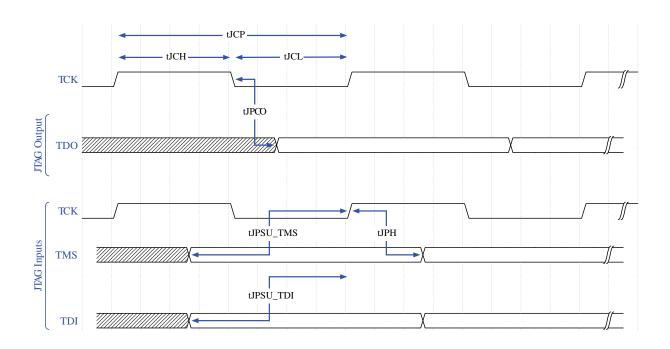

#### Table 6. Intel FPGA Download Cable II DC Operating Conditions

Symbol	Parameter	Conditions	Min	Max	Unit
V <sub>IH</sub>	High-level input voltage	V <sub>CC(TRGT)</sub> >= 2.0 V	0.7 x V <sub>CC(TRGT)</sub>	_	V
	High-level input voltage	V <sub>CC(TRGT)</sub> < 2.0 V	0.65 x V <sub>CC(TRGT)</sub>	_	V
$V_{\mathrm{IL}}$	Low-level input voltage	V <sub>CC(TRGT)</sub> >= 2.0 V	_	0.3 x V <sub>CC(TRG</sub> T)	V
	Low-level input voltage	V <sub>CC(TRGT)</sub> >= 2.0 V	_	0.2 x V <sub>CC(TRG</sub> T)	V
V <sub>OH</sub>	5.0-V high-level output voltage	$V_{CC(TRGT)} = 4.5 \text{ V}, I_{OH} = -32 \text{ mA}$	3.8	_	V
	3.3-V high-level output voltage	$V_{CC(TRGT)} = 3.0 \text{ V, } I_{OH} = -24 \text{ mA}$	2.4	_	٧
	2.5-V high-level output voltage	$V_{CC(TRGT)} = 2.3 \text{ V, } I_{OH} = -12 \text{ mA}$	1.9	_	٧
	1.8-V high-level output voltage	$V_{CC(TRGT)} = 1.65 \text{ V, } I_{OH} = -8 \text{ mA}$	1.2	_	٧
	1.5-V high-level output voltage	$V_{CC(TRGT)} = 1.4 \text{ V, } I_{OH} = -6 \text{ mA}$	1.0	_	٧
V <sub>OL</sub>	5.0-V low-level output voltage	$V_{CC(TRGT)} = 4.5 \text{ V}, I_{OL} = 32 \text{ mA}$	_	0.55	٧
	3.3-V low-level output voltage	$V_{CC(TRGT)} = 3.0 \text{ V, } I_{OL} = 24 \text{ mA}$	_	0.55	V
	2.5-V low-level output voltage	$V_{CC(TRGT)} = 2.3 \text{ V, } I_{OL} = 12\text{mA}$	_	0.3	V
	1.8-V low-level output voltage	$V_{CC(TRGT)} = 1.65 \text{ V, } I_{OL} = 8\text{mA}$	_	0.45	V
	1.5-V low-level output voltage	$V_{CC(TRGT)} = 1.4 \text{ V, } I_{OL} = 6\text{mA}$	_	0.3	V
I <sub>CC(TRGT)</sub>	Operating current (No Load)	V <sub>CC(TRGT)</sub> =5.5 V	_	316	uA

### 2.7. JTAG Timing Constraints and Waveforms

Figure 6. Timing Waveform for JTAG Signals (From Target Device Perspective)

To use the download cable at the maximum capability (24 MHz), meet the timing constraints like in the tabe below for the target device.

The timing constraints require that you consider device specifications as well as trace propagation delays. If you do not follow the recommended constraints, you might encounter timing issues at 24 MHz. If the target design cannot meet these constraints, reduce the possibility of timing issues by slowing the TCK frequency. See "Changing the TCK Frequency" section for instructions on running the download cable at a slower speed.

Table 7. JTAG Timing Constraints for the Target Device

Symbol	Parameter	Min	Max	Unit
tJCP	TCK clock period	41.67	_	ns
tJCH	TCK clock high time	20.83	_	ns
tJCL	TCK clock low time	20.83	_	ns
tJPCO	JTAG port clock to JTAG Header output	_	5.46 (2.5 V) 2.66 (1.5 V)	ns
				continued

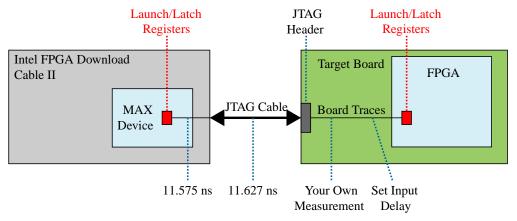

Symbol	Parameter	Min	Max	Unit
tJPSU_TDI	JTAG port setup time (TDI)	_	24.42	ns
tJPSU_TMS	JTAG port setup time (TMS)	_	26.43	ns
tJPH	JTAG port hold time	_	17.25	ns

The simulated timing is based on a slow timing model, which is a worst-case scenario environment.

For device-specific JTAG timing information, refer to the related device data sheet.

Figure 7. Intel FPGA Download Cable II Timing Constraints

If you cannot meet 24 MHz, you must decrease the frequencies to 16-6 MHz. Below is some example code to set the TCK maximum frequency to 6 MHz:

jtagconfig --setparam 1 JtagClock 6M

#### **Related Information**

- Changing the TCK Frequency on page 14
- Documentation: Data Sheets

### 2.8. Changing the TCK Frequency

The download cable has a default TCK frequency of 24 MHz. Where signal integrity and timing prevents operating at 24 MHz, change the TCK frequency of the download cable:

- 1. Open the command line interface with the Intel Quartus Prime bin directory in your path (for example, C:\<Intel Quartus Prime installed folder>\<Intel Quartus Prime version>\quartus\bin64).
- 2. Type the following command to change the TCK frequency:

jtagconfig --setparam <cable number> JtagClock <frequency><unit prefix>

Where:

#### 2. Intel FPGA Download Cable II Specifications

UG-01150 | 2018.04.19

- <cable number> is the download cable to be modified.
- <frequency> is the desired TCK frequency. Use one the following supported rates:
  - 24 MHz
  - 16 MHz
  - 6 MHz
  - 24/n MHz (between 10 kHz and 6 MHz, where n represents an integer value number)
- <unit prefix> is the unit prefix for the frequency (e.g., M for MHz).

Example for setting TCK maximum frequency to 6 MHz:

jtagconfig --setparam 1 JtagClock 6M

### **A. Additional Information**
