### Protection Requirement

- Short Circuit Protection  
When the output of RX is short-circuited, the input power should decrease or stop supplying so that the power supply will not be damaged. And it should automatically recover when the fault is resolved.
- Over Current Protection (OCP)  
OCP Point Limited : 120%~130% auto restart  
When the output at the receiving end exceeds the OCP point, the current output should stop immediately; and is restored when the fault is resolved.

### Reliability Requirements

- Reliability Test

Test items	Test conditions
Storage at high temperature test	+60°C, 16hours
Storage at low temperature test	-20°C, 16hours
Operating at high temperature test	+40°C, 8hours
Operating at low temperature test	-20°C, 8hours
High / Low temperature cycle test	+40°C (2Hrs) → -20°C (2Hrs) → +40°C (2Hrs) → -20°C (2Hrs) continually work 24hours

- Burn-in : 2 hours under +35°C (±5°C), nominal input voltage, nominal load.
