

### Product Overview

The QPL9547 is a high-linearity, ultra-low noise amplifier in a small 2 x 2 mm surface-mount package. At 1.9 GHz, the amplifier typically provides 19.5 dB gain, +39 dBm OIP3 at a 65 mA bias setting, and 0.3 dB noise figure. The LNA can be biased from a single positive supply ranging from 3.3 to 5 volts. The device is housed in a green/RoHS-compliant industry-standard 2x2 mm package.

The QPL9547 is bias adjustable and requires minimal external components to operate. It also has a power down control capability integrated into the die for TDD applications.

## Pad Configuration and Description

Top View

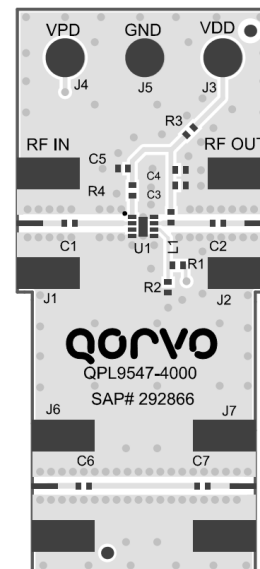

Pad No.	Label	Description
1	V <sub>bias</sub>	Sets the LNA bias current for the device.
2	RF In	RF Input pin, internally matched to 50 ohms. A DC block is required.
6	Shut Down	A high voltage (>1.17V) turns off the device. If the pin is pulled to ground or driven with a voltage less than 0.63V, then the device will operate under LNA ON state.
7	RF Out	RF Output pin, internally matched to 50 ohms. A DC block is required. V <sub>DD</sub> supply pin.
3, 4, 5, 8	NC	Not connected internally. This pin may be left floating or connected to ground.
Backside Paddle	RF/DC GND	Ground connection. The back side of the package should be connected to the ground plane though as short of a connection as possible. PCB vias under the device are recommended.

## Package Marking and Dimensions

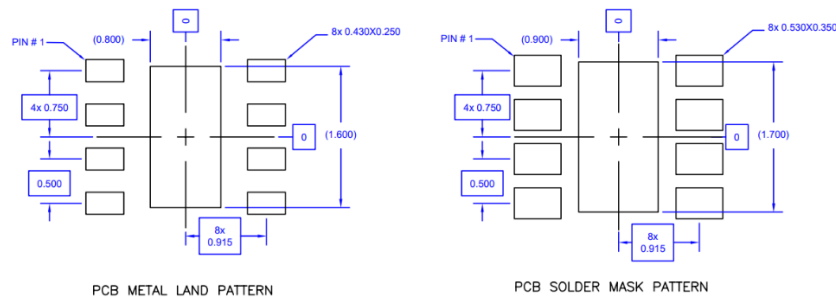

Marking: Part Number – 9547  
Trace Code – up to 4 Characters assigned by sub-contractor

**Notes:**

1. All dimensions are in millimeters. Angles are in degrees.
2. The terminal #1 identifier and terminal numbering conform to SPE-000677.

## Recommended PCB Layout Pattern

**Notes:**

1. All dimensions are in millimeters. Angles are in degrees.
2. Use 1 oz. copper minimum for top and bottom layer metal.
3. Via holes are required under the backside paddle of this device for proper RF/DC grounding and thermal dissipation. We recommend a 0.35mm (#80/.0135") diameter bit for drilling via holes and a final plated thru diameter of 0.25 mm (0.01").
4. Ensure good package backside paddle solder attach for reliable operation and best electrical performance.
