

Datasheet

Registration Mark Sensors with Single Color LED and Potentiometer Adjustment of Switching Threshold

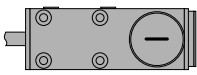

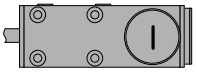

- Fast 10 kHz switching frequency; 15 μ s repeatability
- Rugged zinc alloy die-cast housing with high quality acrylic lens suitable for use around food processing applications: Sensor rated IEC IP67
- Fixed-convergent sensing at 10 mm \pm 3 mm (0.39 in \pm 0.12 in)
- Rectangular 1.2 mm \times 3.8 mm (0.05 in \times 0.15 in) sensing image at 10 mm (0.39 in) from the face of the lens
- Easy selection of Light/Dark Operate (LO/DO) by selection switch
- Red or green LEDs available, depending on model
- Parallel or perpendicular sensing image, depending on model
- 20 millisecond OFF-delay by model

WARNING: Not To Be Used for Personnel Protection

Never use this device as a sensing device for personnel **protection**. Doing so could lead to serious injury or death. This device does not include the self-checking redundant circuitry necessary to allow its use in personnel safety applications. A sensor failure or malfunction can cause either an energized or de-energized sensor output condition.

Models

Models [¶]	Output & Supply Voltage	Focus Distance	Sensing Image Orientation	Emitter Color	OFF-Delay		
R58ACG1	Bipolar NPN/PNP 10 V dc to 30 V dc	10 mm (0.39 in)	Parallel to sensor length 	Green	0		
R58ACG1D					20 ms		
R58ACR1			Perpendicular to sensor length 	Red	0		
R58ACR1D					20 ms		
R58ACG2					Perpendicular to sensor length	Green	0
R58ACG2D							20 ms
R58ACR2					Parallel to sensor length	Red	0
R58ACR2D							20 ms

[¶] Integral 2 m (6.5 ft) unterminated cable models are listed.

- To order the 9 m (30 ft) PVC cable model, add the suffix "W/30" to the cabled model number. For example, R58ACG1 W/30.
- To order the 150 mm (6 in) PVC cable model, add the suffix "Q" to the model number. For example, R58ACG1Q.
- To order the 4-pin M12/Euro-style integral quick disconnect model, add the suffix "Q8" to the model number. For example, R58ACG1Q8.

Overview

R58A sensors offer high-performance, cost-effective registration mark sensing featuring a single emitter color and simplified sensor setup and adjustment.

The switching threshold is adjusted with a potentiometer, and two green LEDs assist with setting the optimal threshold. Output status information is provided by an amber output LED. Light Operate or Dark Operate is also easily selectable via the LO/DO selection switch.

The fast 10 kHz switching frequency and 15 microsecond repeatability ensure reliability in high-speed operations. Models are available with a parallel or perpendicular sensing image, as well as a 20 millisecond OFF-delay to solve a variety of applications. The rugged zinc alloy die-cast housing and high quality acrylic lens are designed to handle ambient electrical noise and vibration from presses and die cutting machinery.

1. Amber Output Indicator
2. Green Setup Indicators
3. Switching Threshold Potentiometer
4. LO/DO Selection Switch

Figure 1. Features

Wiring Diagrams

- Wiring Key:
- 1 = Brown
 - 2 = White
 - 3 = Blue
 - 4 = Black

Set Up the Sensor

1. Align the light spot to the mark.

2. Turn the potentiometer in the direction shown by the green LED until it switches.

3. Align the light spot to the background.

4. Turn the potentiometer, and count turns, in the direction shown by green LED until it switches.

- Turn potentiometer back half the number of turns from step 4.

- Select Light Operate or Dark Operate.

Specifications

Supply Voltage and Current

10 V dc to 30 V dc (10% max. ripple within specified voltage range); 36 mA exclusive of load

Supply Protection Circuitry

Protected against reverse polarity and transient voltages

Output Configuration

Bipolar; one current sourcing (PNP) and one current sinking (NPN)

Output Rating

150 mA max. (each output)

Off-state leakage current: < 10 microamps

NPN saturation: < 200 mV at 10 mA and < 1.0 V at 150 mA

PNP saturation: < 1 V at 10 mA and < 2.0 V at 150 mA

Output Protection Circuitry

Protected against output short-circuit, continuous overload, and false pulse on power-up

Output Response Time

50 microseconds: 100 millisecond delay on power-up (outputs do not conduct)

Repeatability

15 microseconds

Sensing Image

Rectangular: 1.2 mm × 3.8 mm (0.05 in × 0.15 in) at 10 mm (0.39 in) from face of lens; Image oriented either parallel or perpendicular to sensor length, by model (see [Models](#) on page 1).

Adjustments

Light/Dark Operate (LO/DO) select switch, and 15-turn switchpoint adjustment potentiometer

Indicators

1 Amber: Output active

2 Green: Switchpoint threshold adjustment indicators

Construction

Housing: Zinc alloy die-cast housing with black painted finish and o-ring sealed lens port cap

Lens: Acrylic

Lens port cap and lens holder: ABS

Sensitivity and LO/DO adjusters: Acetal

OD: Anodized aluminum

Environmental Rating

IEC IP67; NEMA 6

Connections

PVC-jacketed 4-conductor 2 m (6.5 ft); 9 m (30 ft) attached cable; integral 4-pin Euro-style QD fitting; or 150 mm (6 in) with 4-pin Euro-style QD fitting. Mating QD cordsets are purchased separately.

Operating Conditions

Temperature: -10 °C to +55 °C (+14 °F to +131 °F)

Storage Temperature -20 °C to +80 °C (-4 °F to +176 °F)

90% at +50 °C maximum relative humidity (non-condensing)

Vibration and Shock

All models meet IEC 68-2-6 and IEC 68-2-27 testing criteria

Application Notes

- Do not mount the sensor directly perpendicular to shiny surfaces; position it at approximately 15 angle in relation to the sensing target.
- Minimize web or product "flutter" whenever possible to maximize sensing reliability. Position sensor near a roller if possible.
- The lens may be installed in either of the two lens ports. The lens port cap must be installed on the unused port for reliable operation.

Required Overcurrent Protection

WARNING: Electrical connections must be made by qualified personnel in accordance with local and national electrical codes and regulations.

Overcurrent protection is required to be provided by end product application per the supplied table.

Overcurrent protection may be provided with external fusing or via Current Limiting, Class 2 Power Supply.

Supply wiring leads < 24 AWG shall not be spliced.

For additional product support, go to www.bannerengineering.com.

Supply Wiring (AWG)	Required Overcurrent Protection (Amps)
20	5.0
22	3.0
24	2.0
26	1.0
28	0.8
30	0.5
