

## 1-Phase Solid State Contactors, 'U'- type connection

### Benefits

- **Panel space savings.** The slimmest product in the range accommodates up to 25 AAC in a width of only 17.5 mm giving 25% space saving per SSR compared to 22.5 mm solutions.
- **Less maintenance costs.** Wire bonding technology reduces thermal and mechanical stresses of the output chips resulting in a larger number of operational cycles compared to other assembly technologies.
- **Low machine downtime.** Integrated overvoltage protection prevents the solid state relay from breaking down due to uncontrolled transients that may occur on the lines.
- **Ease of use.** The RGC ready-to-use solution is provided with integrated heatsink thus eliminating the need for the user to calculate the size of heatsink needed for adequate thermal dissipation.
- **Cost effective protection co-ordination.** The high I<sup>2</sup>t specification permits easy Type 2 protection co-ordination with B-type Miniature Circuit Breakers.
- **Fast wiring.** Power connections for models rated >30 A are equipped with terminals that can handle cables up to 25 mm<sup>2</sup> / AWG3 cables.
- **Accommodates UL508A requirements for Industrial Control Panels.** The RGC is certified as a listed product. All models carry a 100 kArms Short Circuit Current Rating.
- **Protection against SSR overheat.** Optional feature with integrated over temperature protection protects the RGC output from getting damaged in case of overheating. This feature is present by default on the variants with integrated fan and optional on other variants.

### Description

This slimline range of solid state contactors is an evolution of solid state switches for which Carlo Gavazzi is very well known. The RG solid state contactors present a unique opportunity for panel space savings thanks to their very slim footprint.

The **RGC** is the ready-to-use range that is provided with an integrated heatsink. The smallest footprint occupies only a width of 17.5 mm with ratings up to 30 AAC.

The RGC output is protected against overvoltages by means of an integrated varistor. Control ON indication is provided through a green LED.

Specifications are at a surrounding temperature of 25°C unless otherwise specified.

### Applications

Plastic injection machines, extrusion machines, blow moulding machines, thermoformers, dryers, electrical ovens, fryers, shrink tunnels, air handling units, sterilisation equipment, climatic chambers, ovens and furnaces, ambient heating.

### Main features

- Ratings up to 660 VAC, 85 A @ T<sub>A</sub> 40°C
- Up to 18000 A<sup>2</sup>s for I<sup>2</sup>t for protection coordination with M.C.Bs
- 100 kA short circuit current rating according to UL508
- Conformance to Railway standards

600 VAC, IO	4- 32 VDC	RGC1B60D40KGU	RGC1B60D42KGU	RGC1B60D60KGU	RGC1B60D62KGU

## Selection guide - continued

For variants with integrated Over Temperature Protection:

Rated voltage, Switching mode	Control voltage	Rated operational current @ 40°C		
		40 AAC (3200 A <sup>2</sup> s)	60 AAC (3200 A <sup>2</sup> s)	85 AAC (6600 A <sup>2</sup> s)
		Product width		
		35 mm	70 mm	70 mm + fan
600 VAC, ZC	5 - 32 VDC	RGC1A60D40GGUP	RGC1A60D60GGUP	RGC1A60D90GGUP
	20-275 VAC, 24-190 VDC	RGC1A60A40GGUP	RGC1A60A60GGUP	RGC1A60A90GGUP
600 VAC, IO	5 - 32 VDC	-	-	RGC1B60D90GGUP

KGU: input terminals = screw

output terminals = box clamp

GGUP: input terminals = box clamp

output terminals = box clamp

For variants with bulk packaging of 20 pcs.

Rated voltage, Switching mode	Control voltage	Rated operational current @ 40°C		
		20 AAC (525 A <sup>2</sup> s)	25 AAC (1800 A <sup>2</sup> s)	-
		Product width		
		17.5 mm, low depth	17.5 mm, low depth	-
600 VAC, ZC	4 - 32 VDC	RGC1A60D15KGUX20	RGC1A60D25KGUX20	-

Note:

- Control input lines must be installed together to maintain products' susceptibility to Radio Frequency interference.
- Use of AC solid state relays may, according to the application and the load current, cause conducted radio interferences. Use of mains filters may be necessary for cases where the user must meet E.M.C requirements. The capacitor values given inside the filtering specification tables should be taken only as indications, the filter attenuation will depend on the final application.
- This product has been designed for Class A equipment. Use of this product in domestic environments may cause radio interference, in which case the user may be required to employ additional mitigation methods.
- Performance Criteria 1 (PC1): No degradation of performance or loss of function is allowed when the product is operated as intended.
- Performance Criteria 2 (PC2): During the test, degradation of performance or partial loss of function is allowed. However when the test is complete the product should return operating as intended by itself.
- Performance Criteria 3 (PC3): Temporary loss of function is allowed, provided the function can be restored by manual operation of the controls.

## Environmental specifications

<b>Operating temperature</b> RGC..P	-40°C to +80°C (-40°F to +176°F) -30°C to +70°C (-22°F to +158°F)
<b>Storage temperature</b>	-40 to +100°C (-40 to +212 °F)
<b>Relative humidity</b>	95% non-condensing @ 40°C
<b>Pollution degree</b>	2
<b>Installation altitude</b>	0-1000 m. Above 1000 m derate linearly by 1% of FLC per 100 m up to a maximum of 2000 m
<b>Vibration resistance</b>	2g / axis (2-100Hz, IEC 60068-2-6, EN 50155, EN 61373)
<b>Impact resistance</b>	15/11 g/ms (EN50155, EN61373)
<b>EU RoHS compliant</b>	Yes
<b>China RoHS</b>	

The declaration in this section is prepared in compliance with People's Republic of China Electronic Industry Standard SJ/T11364-2014: Marking for the Restricted Use of Hazardous Substances in Electronic and Electrical Products.

Part Name	Toxic or Harardous Substances and Elements					
	Lead (Pb)	Mercury (Hg)	Cadmium (Cd)	Hexavalent Chromium (Cr(VI))	Polybrominated biphenyls (PBB)	Polybrominated diphenyl ethers (PBDE)
<b>Power Unit Assembly</b>	x	○	○	○	○	○

O: Indicates that said hazardous substance contained in homogeneous materials for this part are below the limit requirement of GB/T 26572.

X: Indicates that said hazardous substance contained in one of the homogeneous materials used for this part is above the limit requirement of GB/T 26572.

这份申明根据中华人民共和国电子工业标准  
SJ/T11364-2014：标注在电子电气产品中限定使用的有害物质

零件名称	有毒或有害物质与元素					
	铅 (Pb)	汞 (Hg)	镉 (Cd)	六价铬 (Cr(VI))	多溴化联苯 (PBB)	多溴联苯醚 (PBDE)
功率单元	x	○	○	○	○	○

O:此零件所有材料中含有的该有害物低于GB/T 26572的限定。

X: 此零件某种材料中含有的该有害物高于GB/T 26572的限定。

## Short circuit protection

### Protection Co-ordination, Type 1 vs Type 2:

Type 1 protection implies that after a short circuit, the device under test will no longer be in a functioning state. In Type 2 co-ordination the device under test will still be functional after the short circuit. In both cases, however the short circuit has to be interrupted. The fuse between enclosure and supply shall not open. The door or cover of the enclosure shall not be blown open. There shall be no damage to conductors or terminals and the conductors shall not separate from terminals. There shall be no breakage or cracking of insulating bases to the extent that the integrity of the mounting of live parts is impaired. Discharge of parts or any risk of fire shall not occur.

The product variants listed in the table hereunder are suitable for use on a circuit capable of delivering not more than 100,000 Arms Symmetrical Amperes, 600 Volts maximum when protected by fuses. Tests at 100,000 A were performed with Class J fuses, fast acting; please refer to the table below for maximum allowed ampere rating of the fuse. Use fuses only.

Tests with Class J fuses are representative of Class CC fuses.

Protection co-ordination Type 1 according to UL 508				
Part No.	Prospective short circuit current [kArms]	Max fuse size [A]	Class	Voltage [VAC]
RGC..15	100	10	J	Max. 600
		15	CC

8. Between MCB and Load (including return path which goes back to the mains)

Note: A prospective current of 6 kA and a 230 / 400 V power supply is assumed for the above suggested specifications. For cables with different cross section than those mentioned above please consult Carlo Gavazzi's Technical Support Group.

S201 models refer to 1-pole M.C.B., S202 models refer to 2-poles M.C.B.

## Over temperature alarm procedure and fan operation for versions with integrated fan

ALARM Signal and Fan  
(applicable to RGC..D90GGUP)

ALARM Signal only

### CAUTION

- Alarm condition resets whenever the voltage signal is removed from terminal A1 (+)
- In the case of RGC1A60D90GGUP, if the voltage signal is not applied across A1(+) and A2 (-) terminals, the overtemperature detection and functionality is lost (including fan operation and alarm signalling)
- In the case of RGC1A60A90GGUP it is necessary to supply IN2 and IN3 with 24VDC for fan operation.
- Alarm procedure for RGC1A60A90GGUP follows 'Alarm signal only' flow since fan is continuously operating.
- Alarm condition automatically resets ONLY when power semiconductor temperature < 80 °C
- Temperatures indicated are typical figures.
