RGS-9244GP Series

Industrial 28-port rack mount managed Gigabit Ethernet switch with 24x10/100/1000Base-T(X) and 4x100/1000Base-X, SFP socket

Features

➢ Support **O-Ring** (recovery time < 30ms) and MSTP(RSTP/STP compatible) for Ethernet Redundancy

➢ **O-Chain** allow multiple redundant network rings

➢ Support standard IEC 62439-2 **MRP**^{*NOTE} (Media Redundancy Protocol) function

➢ Support IPV6 new internet protocol version

➢ Support Modbus TCP protocol

➢ Support IEEE 802.3az **Energy-Efficient Ethernet** technology

➢ Provided HTTPS/SSH protocol to enhance network security

➢ Support SMTP client and NTP server

➢ Support IP-based bandwidth management

➢ Support application-based QoS management

➢ Support Device Binding security function

➢ Support DOS/DDOS auto prevention

➢ IGMP v2/v3 (IGMP snooping support) for filtering multicast traffic

➢ Support SNMP v1/v2c/v3 & RMON & 802.1Q VLAN Network Management

➢ Support ACL and 802.1x User Authentication for security

➢ Support 10K Bytes Jumbo Frame

➢ SFP socket support DDM function

➢ Multiple notification for warning of unexpected event

➢ Web-based ,Telnet, Console (CLI), and Windows utility (**Open-Vision**) configuration

➢ Support LLDP Protocol

➢ Support **DBU-01** backup unit device to quickly backup/restore configuration

➢ 19 inches rack mountable design

➢ Support IEEE 1588v2 PTP clock synchronization

Introduction

RGS-9244GP series are Gigabit managed redundant ring Ethernet switch with 24x10/100/1000Base-T(X) ports and 4x100/1000Base-X SFP ports.   These switches support Ethernet Redundancy protocol, **O-Ring** (recovery time < 30ms) and MSTP (RSTP/STP compatible) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology.   And RGS-9244GP series support wide operating temperature from -40 ℃ to 75 ℃.   RGS-9244GP series can also be managed centralized and convenient by Open-Vision, as well as the Web-based interface, Telnet and console (CLI) configuration.   Therefore, the switch is one of the most reliable choice for highly-managed and Fiber Ethernet application.
- **O-Ring :** O-Ring is ORing's proprietary redundant ring technology, with recovery time of less 30 milliseconds and up to 250 nodes.   The O-Ring redundant ring technology can protect mission-critical application from network interruptions or temporary malfunction with its fast recover technology.
- **O-Chain :** O-Chain is the revolutionary network redundancy technology that provides the add-on network redundancy topology for any backbone network, O-Chain allows multiple redundant network rings of different redundancy protocols to join and function together as a larger and more robust compound network topology.   O-Chain providing ease-of-use while maximizing fault-recovery swiftness, flexibility, compatibility, and cost-effectiveness in one set of network redundancy topology.
- **MRP*NOTE* : Media Redundancy Protocol** (**MRP*NOTE***) is a data network protocol standardized by the IEC 62439-2. It allows rings of Ethernet switches to overcome any single failure with recovery time much faster than achievable with Spanning Tree Protocol.
- **Application-Based QoS :** The switch also support application-based QoS.   Application-based QoS can set highest priority for data stream according to TCP/UDP port number.
- **Device Binding Function :** ORing special Device Binding function can only permit allowed IP address with MAC address to access the network.   Hacker cannot access the IP surveillance network without permission.   It can avoid hacker from stealing video privacy data and attacking IP camera, NVR and controllers.
- **Advanced DOS/DDOS Auto Prevention :** The switch also provided advanced DOS/DDOS auto prevention.   If there is any IP flow become big in short time, the switch will lock the source IP address for certain time to prevent the attack.   It's hardware based prevention so it can prevent DOS/DDOS attack immediately and completely.
- **Modbus TCP :** This is a Modbus variant used for communications over TCP/IP networks.
- **IEEE 802.3az Energy-Efficient Ethernet :** This is a set of enhancements to the twisted-pair and backplane Ethernet family of networking standards that will allow for less power consumption during periods of low data activity. The intention was to reduce power consumption by 50% or more.

Open-Vision

ORing's switches are intelligent switches.   Different from other traditional redundant switches, ORing provides a set of

Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.
