# S1D13506 Color LCD/CRT/TV Controller

The S1D13506 is a color LCD/CRT/TV graphics controller interfacing to a wide range of CPUs and display devices. The S1D13506 architecture is designed to meet the low cost, low power requirements of the embedded markets, such as Mobile Communications, Hand-Held PC's, and Office Automation.

The S1D13506 supports multiple CPUs, all LCD panel types, CRT, TV, and additionally provides a number of differentiating features. Products requiring digital camera input can take advantage of the directly supported WINNOV VideumCam<sup>™</sup> digital interface. EPSON Independent Simultaneous Display allows the user to configure two different images on two different displays, while the SwivelView<sup>™</sup>, Hardware Cursor, Ink Layer, and BitBLT engine offer substantial performance benefits. These features, combined with the S1D13506's Operating System independence, make it an ideal display solution for a wide variety of applications.
