FIBRE OPTIC SENSOR FOR DIN RAIL MOUNTING

- 10 bit resolution models with 500 μ s response for high operating distances
- 12 bit resolution models with 50 μs response and 4 digit display for high speed
- Cost-effective models with multiturn trimmer adjustment
- EASYtouch™ push-button setting with remote control, keylock and output delay
- Ultra-thin housing with CLEARLOCK[™] patented fibre fixing system

S7 SERIES

the 1st in Europe

The **S7** series is the first fibre optic amplifier to be manufactured in Europe that is equipped with a full 4 digit display, confirming Datasensor's technological leadership. With its slim 10mm body width, the **S7** represents the ideal solution for all applications requiring high accuracy sensing combined with very compact dimensions.

The high resolution 12 bit amplifier has a response time of 50 μ s for a switching frequency of 10 Khz; 4096 resolution steps make the **S7** series perfect for ultra high precision detection of small objects and low colour contrasts.

This is made easier by the integral 4 digit display, which clearly indicates the received signal, selected time delay and the adjustable set point values. Moreover, the white light LED emission possibility enhances the contrast detection.

Installing and setting the **S7** is easy and rapid, thanks to the patent-covered $CLEARLOCK^{TM}$ fibre fixing and $EASYtouch^{TM}$ adjustment system that offers remote setting, keylock and activation of the output OFF delay function.

Furthermore new versions of the **S7** series are available with multiturn mechanical trimmer threshold adjustment for cost-oriented applications.

S7 FIBRE-OPTIC SENSORS

The ultra-thin housing is specifically designed for side-by-side mounting on DIN rail where space is limited or mounting through two M3 clearance holes onto the side of a machine. The CLEARLOCK[™] fibre-optic fixing system assists reliable insertion of standard and high performance fibre-optics. 2.2mm Ø The EASYtouch[™] one touch setting procedure automatically selects the best detection conditions. For critical applications a two touch setting is provided for fine tuning. S7 benefits from remote teach, keypad lock and delay off timing functions. For further information on our extensive range accessories please see our OF and OFA fibre optic datasheet.
