# 1 Clarifications for Revision 3

The following specifications apply to the MC9S08EL32/16 and MC9S08SL16/8.

| C              | Characteristic                                   | Symbol            | V <sub>DD</sub> (V) | Typ      | Max        | Unit |
|----------------|--|-------------------|---------------------|----------|------------|------|
| P <sup>1</sup> | Stop3 mode supply current 125 °C (M suffix only) | S3I <sub>DD</sub> | 5<br>3              | 60<br>55 | 110<br>105 | μA   |
| P <sup>1</sup> | Stop2 mode supply current 125 °C (M suffix only) | S2I <sub>DD</sub> | 5<br>3              | 50<br>45 | 100<br>95  | μA   |

<sup>1</sup> Stop currents are tested in production for 25°C on all parts. Tests at other temperatures depend upon the part number suffix and maturity of the product. Freescale may eliminate a test insertion at a particular temperature from the production test flow once sufficient data has been collected and is approved.

# 2 Addendum for Revision 3

Table 1. MC9S08EL32 DataSheet Revision 3 Errata

| Location                               | Description  |
|--|--|
| Section "SLIC During Break Interrupts" | Remove section "SLIC During Break Interrupts" on MC9S08EL32 Data Sheet. This functionality does not exist on the 9S08EL/SL family. |

# 3 Revision History

Table 2 provides a revision history for this document.

Table 2. MC9S08EL32AD Revision History

| Rev. Number | Substantive Changes  | Date of Release |
|-------------|--|-----------------|
| 1           | Remove Section " SLIC During Break Interrupts" in MC9S08EL32 Data Sheet. | 12/2011         |
