

Proximity Magnetic Sensors Rectangular Housing S Series

- Rectangular plastic housing
- NO, NC, CO, Bistable or Bistable CO output functions
- Side operated

Product Description

The standard proximity magnetic sensor series is characterized by a plastic rectangular housing; the sensor switching is side type. Several operating distances

may be obtained thanks to the wide range of magnetic units available. Two holes provided in the body allow an easy and fast mounting.

Distances are specified in millimeters (mm)

xx/xx: operating distance (for all Output functions); xx/xx*: reswitching contact distance.
Outside the above mentioned range, the sensor maintains the initial state.

** the magnetic unit must be installed perpendicular to the switch longitudinal axis.

*** the magnetic unit must be installed perpendicular to the switch upper surface.
