1. When ordering, please specify packaging code:

SCS-200LD

- Packaging:
   D = 13" machine-ready reel. EIA-481 embossed plastic tape (200 parts per full reel). Quantities less than full reel available: in tape (not machine ready) or with leader and trailer (\$25 charge).
  - B = Less than full reel. In an effort to simplify our part numbering system, Coilcraft is eliminating the need for multiple packaging codes. When ordering, simply change the last letter of your part number from B to D.
- 2. Inductance measured between secondary pins at 10 kHz, 0.06 Vrms, 0 Adc.
- 3. Primary DCR is measured with the windings connected in parallel.
- For specific questions regarding frequency range, please contact us at cst@coilcraft.com.
- 5. Maximum volt-time product is for the secondary, based on 2000 Gauss.
- 6. Primary current of 30 A causes less than 25°C temperature rise from 25°C ambient. Higher current causes a greater temperature rise (see Temperature Rise vs Current curve).
- 7. Terminating resistance (R<sub>T</sub>) value is based on 1 Volt output with 30 Amps flowing through the primary. Varying terminating resistance increases or decreases output Voltage/Ampere according to the following equation:  $R_T = V_{out} \times N_{sec}/I_{in.}$
- 8. Electrical specifications at 25°C.

Refer to Doc 362 "Soldering Surface Mount Components" before soldering.
