PRODUCT DESCRIPTION

The SLM series of LED drivers is ideally suited for LED lighting applications in stage and studio environments. These devices are compatible with most industry standard, reverse-phase (trailing edge) wall-based dimmers, and 0-10V wall-based dimmers and offer deep dimming from 100% down to 0.01%.

FEATURES

- Compatible with ELV (reverse-phase or trailing-edge) and 0-10 V dimmers
- TRIAC and ELV dimming only at 120 Vac
- 12 V/100 mA auxiliary output
- Protections: output open load, short-circuit (latch-off), and overtemperature with auto recovery
- Conducted and radiated EMI: Compliant with FCC CFR Title 47 Part 15 Class A (120 and 277 Vac) and EN55015 (CISPR 15) at 220/230/240 Vac
- Enables ENERGY STAR® and DLC (DesignLight Consortium®) luminaire compliance DESIGNLIGHTS

- IP64-rated case with silicone-based potting
- 90°C maximum case hot spot temperature
- Double-insulated power supply between input and output
- Worldwide safety approvals CB

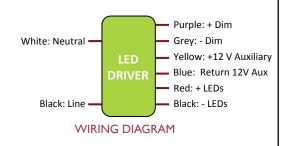

ALUMINUM CASE: L 101.6 x W 50.8 x H 38.5mm $(L4 \times W2 \times H1.52 in)$

APPLICATIONS

- Stage lighting
- Studio lighting
- LED display signage

Tri-Mode Dimming (TRIAC, ELV & 0-10 V) High Power CC LED Drivers with 0.01-100% Dimming Range

I - INPUT SPECIFICATION (@25°C ambient temperature)

| | Units | Minimum | Typical | Maximum | Notes |
|----------------------------------|-------|---------------|--------------------|---------------------|---|
| Input Voltage Range (Vin) | Vac | 90 | 120/220/230/ | 305 | The rated output current for each model is achieved at |
| input voitage Range (viii) | Vac | 30 | 240/277 | 303 | Vin ≥ 115 Vac and at Vin ≥ 209 Vac, at nominal load. |
| Input Frequency Range | Hz | 47 | 60 | 63 | |
| Power Factor (PF) | | 0.9 | > 0.9 | | At nominal input voltage and with nominal LED voltage |
| Inrush Current | | Meets I | NEMA-410 requ | irements | At any point on the sine wave and 25°C |
| Leakage Current | μΑ | | | 500 μΑ | Measured at nominal input voltage per IEC60950-1 |
| Input Harmonics | Com | olies with IE | C61000-3-2 for | Class C equipment | |
| Total Harmonics Distortion (THD) | | | | 20% | •At nominal input voltage and nominal LED voltage •Complies with DLC (DesignLight Consortium) technical requirements v2.1 |
| Efficiency | % | - | 90% | - | Measured with nominal input voltage, a full sinusoidal wave form and without dimmer connected |
| Isolation | Meets | UL60950-1 | for class II reinf | orced/double insula | ation power supply 🔲 |

2 - OUTPUT SPECIFICATION (@25°C ambient temperature)

| | Units | Minimum | Typical | Maximum | Notes |
|---------------------------|-------|---------|-----------------|-------------|---|
| | | | MA | AIN CONSTAI | NT CURRENT OUTPUT |
| Output Voltage (Vout) | Vdc | 21 | | 85 | See ordering information for details |
| Output Current (lout) | mA | 1800 | | 3900 | See ordering information for details The rated output current for each model is achieved at Vin ≥ 115 Vac and at Vin ≥ 209 Vac, at nominal load. |
| Output Current Regulation | % | -5 | ±2.5 | 5 | At nominal AC line voltage Includes load and current set point variations |
| Output Current Overshoot | % | - | - | 10 | The driver does not operate outside of the regulation requirements for more than 500 ms during power on with nominal LED load and without dimmer. |
| Ripple Current | : | | odel M160W-3 | | Measured at nominal LED voltage and nominal input voltage without dimming. Calculated in accordance with the IES Lighting Handbook, 9th edition. |
| Dimming Range (% of lout) | % | 0.1 | | 100 | The dimming range will be dependent on each specific dimmer. |
| Start-up Time | S | | 0.5 | | With nominal LED voltage, nominal AC line voltage and without dimmer attached |

| | | | 12 V AU | XILIARY CON | ISTANT VOLTAGE OUTPUT |
|------------------------------|-----|------|---------|-------------|---|
| Output Voltage (Vout) | Vdc | 10.2 | 12 | 13.2 | The voltage regulation is $+10\%/-15\%$ and the ripple voltage shall be $\leq 0.4V$. |
| Output Current (lout) | mA | | 100 | | |

| | OUTPUT CONTROLS |
|--------------------------|--|
| | The +Dim/-Dim signal pins can be used to adjust the output setting via a standard commercial wall dimmer, an |
| +Dim Signal, -Dim Signal | external control voltage source (0 to 10 Vdc), or a variable resistor when using the recommended number of LEDs. |
| | The dimming input permits 0.1% to 100% dimming. |

Tri-Mode Dimming (TRIAC, ELV & 0-10 V) High Power CC LED Drivers with 0.01-100% Dimming Range

5 - PROTECTION FEATURES

Under-Voltage (Brownout)

The SLM series provides protection circuitry such that an application of an input voltage below the minimum stated in paragraph 1 (Input Specification) shall not cause damage to the driver.

Short Circuit

The SLM series is protected such that a short from any output to return shall not result in a fire hazard or shock hazard. In the event of a short, the driver shuts down and latches off as a result of short circuit fault for main output. Removal of fault and AC recycling returns the driver to normal operation.

Internal Over temperature Protection

The SLM series incorporates circuitry that prevents internal damage due to an over temperature condition. An over temperature condition may be a result of an excessive ambient temperature or as a result of an internal failure. When the over temperature condition is removed, the driver shall automatically recover.

Output Open Load

When the LED load is removed, the output voltage of the SLM series is limited to 1.3 times the maximum output voltage of each model.

230 Vac Protection

The SLM series is compatible with ELV dimming only at 120 Vac. 230 Vac ELV dimming is not supported in the SLM series. However, in the event that someone tries to TRIAC-dim or ELV-dim the SLM series at 230 Vac, it has been added a protection to clamp the internal bus and keep it in safe operating mode.

Tri-Mode Dimming (TRIAC, ELV & 0-10 V) High Power CC LED Drivers with 0.01-100% Dimming Range

6 - PHASE-CUT DIMMING

The SLM series offers dual dimming compatibility with reverse-phase (trailing-edge) phase-cut ELV dimmers and 0–10V dimmers. ELV dimming is only offered at 120 Vac.

Figures 1 and 2 show the typical output current versus conduction angle at nominal input voltage.

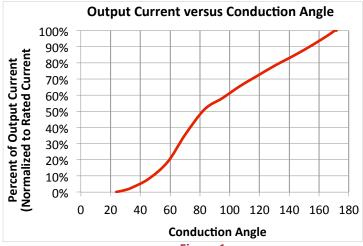

Figure 1

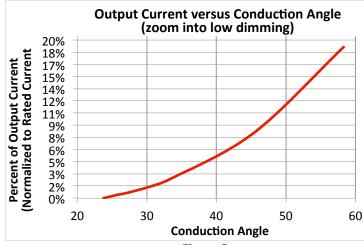

Figure 2

Tri-Mode Dimming (TRIAC, ELV & 0-10 V) High Power CC LED Drivers with 0.01-100% Dimming Range

8 - 0-10 V DIMMING

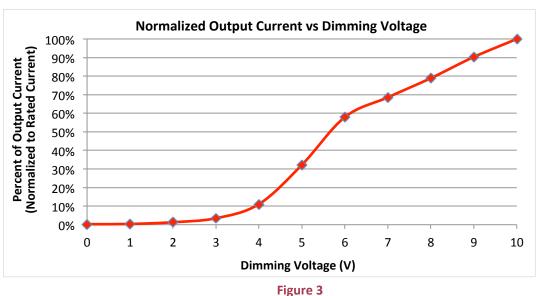

The SLM drivers operate only with 0-10V dimmers that sink current. They are not designed to operate with 0-10V control systems that source current, as used in theatrical/entertainment systems. Developed in the 1980's, the 0-10V sinking current control method is adopted by the International Electrotechnical Commission (IEC) as apart of their IEC Standard 60929 Annex E.

The method to dim the output current of the driver is done via the +Dim/-Dim Signal pins. The +Dim/-Dim Signal pins respond to a 0 to 10 V signal, delivering 1% to 100% of the output current based on rated current for each model. A pull-up resistor is included internal to the driver. When the +Dim input (purple) is short circuited to the -Dim wire (grey) or to the -LED wire (black), there is no output current. When the +Dim input (purple) is ≤ 1 V, the output current is programmed to $\le 10\%$ of rated current. If the +Dim input is > 10V or open circuited, the output current is programmed to $\le 100\%$ of the rated current.

When not used, the –Dim wire (grey) and to the +Dim wire (purple) can be capped or cut off. In this configuration, no dimming is possible and the driver delivers 100% of its rated output current.

The maximum source current (flowing from the driver to the 0-10V dimmer) supplied by the +Dim Signal pin is \leq 2.5 mA. The tolerance of the output current while being dimmed shall be +/-8% typical until down to 2V.

9 - COMPATIBLE 0-10 V DIMMERS

- Lutron, Nova series (part number NFTV)
- Lutron, Diva series (part number DVTV)

Tri-Mode Dimming (TRIAC, ELV & 0-10 V) High Power CC LED Drivers with 0.01-100% Dimming Range

10 - MECHANICAL DETAILS

Packaging Options: Aluminum extruded case

I/O Connections: Flying leads, 18 AWG on power leads, 18 AWG on control leads, 203 mm (8 in) long, 105°C rated,

stranded, stripped by approximately 9.5mm, and tinned. All the wires, on both input and output,

have a 300 V insulation rating.

Ingress Protection: IP64 rated

Mounting Instructions: The driver must be secured on a flat surface through the four mounting tabs, shown here below in

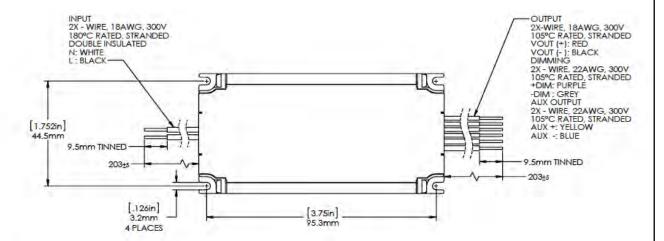

the case outline drawings

II - OUTLINE DRAWINGS

Dimensions: L 101.6 x W 50.8 x H 38.5 mm (L 4.0 x W 2.0 x H 1.52 in)

Volume: 198.7 cm³ (12.13 in³)

Weight:
