

16-bit digital input card based on the CLT01-38S4 high-speed  
protected digital termination array

---

Data brief

## Features

- 8/16 input channel topology (CLT01-38S4 chip on STEVAL- IFP023V1 board)
  - Fully integrated current limiter
  - Termination for IEC 61131-2 type 1 and 3 inputs
  - SPI communication peripheral working at high frequency
  - Voltage regulator integrated on chip
  - Thermal/voltage alarms and checksum
  - Wide range supply voltage operation
  - Low power dissipation compared to discrete solutions

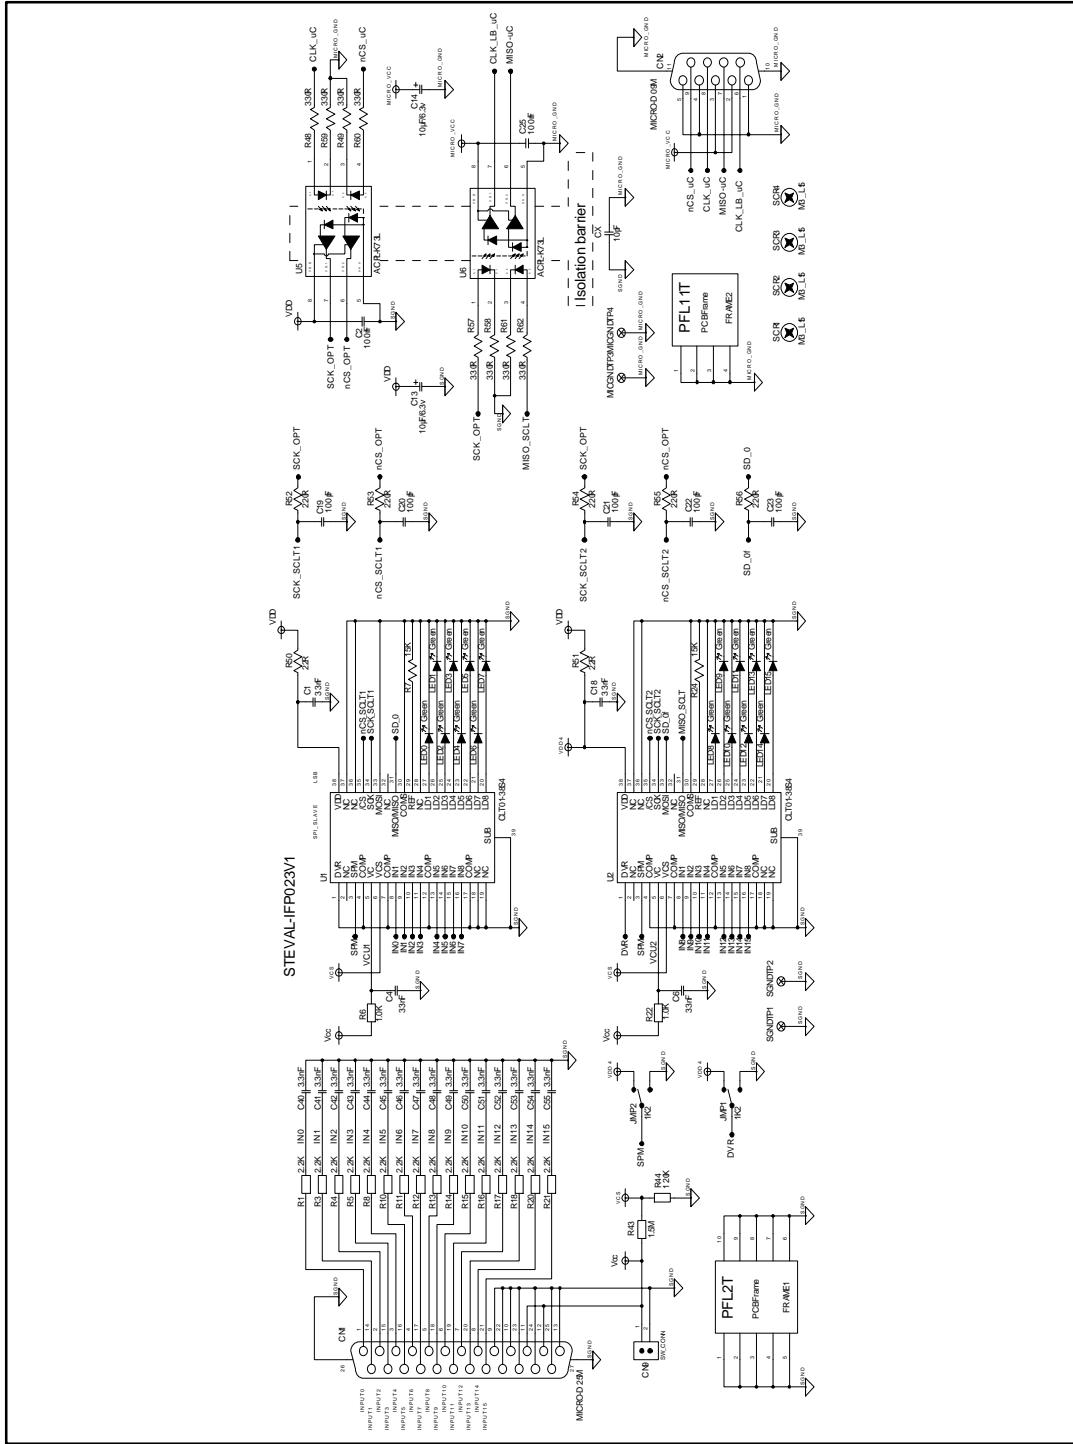

- Low external component count
  - Overvoltage protection
  - ESD in accordance with IEC 61000-4-2, class 3, 8 kV air discharge, 6 kV contact discharge
  - Excellent EMC immunity
    - High energy surge (IEC 61000-4-5), 2 kV / criteria “B” without external protection
    - Fast transient burst (IEC 61000-4-4),  $\pm$  3 kV criteria “A”
    - RF amplitude modulation (IEC 61000-4-6), 150 kHz - 80 MHz, 3 V / criteria “A”
  - SPI bus provides cost-effective isolation
  - Reduces overall dissipation
  - Compact module HTSSOP-38 package
  - RoHS compliant

## Description

The STEVAL-IFP023V1 product evaluation board allows designers to evaluate the performance of the CLT01-38S4 high-speed protected digital termination array in industrial environmental conditions. The board includes two CLT01-38S4 chips connected to an SPI bus in a daisy chain configuration. It offers a 16-bit digital input interface and indicates each sensor logic state with an LED.
