

## High temperature 10 A sensitive TRIACs

### Features

- Medium current TRIAC
- Logic level sensitive TRIAC
- 150 °C max.  $T_j$  turn-off commutation
- Clip bounding
- RoHS (2002/95/EC) compliant packages

### Applications

- The T1010H is designed for the control of AC actuators in appliances and industrial systems.
- The multi-port drive of the microcontroller can control the multiple loads of such appliances and systems through these sensitive gate TRIACs.

### Description

Specifically designed to operate at 150 °C, the new 10 A T1010H TRIACs provide an enhanced performance in terms of power loss and thermal dissipation. This allows the optimization of the heatsink size, leading to space and cost effectiveness when compared to electro-mechanical solutions.

Based on ST logic level technology, they offer an  $I_{GT}$  lower than 10 mA and specified minimal commutation and high noise immunity levels valid up to the  $T_j$  max.
