

## High temperature 10 A Snubberless™ Triacs

### Features

- Medium current Triac
- 150 °C max.  $T_j$  turn-off commutation
- Low thermal resistance with clip bonding
- Very high 3 quadrant commutation capability
- Packages are RoHS (2002/95/EC) compliant
- UL certified (ref. file E81734)

### Applications

Especially designed to operate in high power density or universal motor applications such as vacuum cleaner and washing machine drum motor, these 10 A Triacs provide a very high switching capability up to junction temperatures of 150 °C.

The heatsink can be reduced, compared to traditional Triacs, according to the high performance at given junction temperatures.

### Description

Available in through-hole or surface mount packages, the T1035H and T1050H Triacs series are suitable for general purpose mains power ac switching.

By using an internal ceramic pad, the T10xxH-6I provides voltage insulation (rated at 2500 V rms).

**Table 1. Device summary**

Symbol	Value	Unit
$I_{T(RMS)}$	10	A
$V_{DRM}/V_{RRM}$	600	V
$I_{GT}$	35 or 50	mA
