# MICROTHERM sentronic

Thermal motor protector

**Temperature limiter** 

Thermal cut-out

### **Applications**

- Motors
- Transformers
- Coils
- Electronics, sensors

## Benefits

- Temperature and current sensitive or only temperature sensitive
- Small dimensions
- High power rating
- No vibration noise

#### **Description**

Switches of the **T1** and **T2** type series are based on a two-contact system. A thermo-bimetal snap-disc, which is influenced by temperature, switches on or closes a circuit when the permanently set switching temperature is reached. In this case, the electr. current directly through the bimetallic discharge element, and thus allows a combination of temperature and current sensitive monitoring.

The temperature will thereby be applied to the inner precision switching unit from all sides. The current sensitivity of the switching element is particularly effective when the motor is blocked, and the current flow is considerably higher: the drive is **switched off very quickly** and thus damage to the device is prevented through an increased temperature.

Beside the standard counters in single implementation the protectors are also offered in **twin and triplet configuration**.

#### **Technical data**

type ratings			control					
			T11A/E	T12 A / E	T22 A	T10B/G	T22 B	
version			normally closed			normally open		
rated current at 250 V 50/60 Hz ( power factor 0.95 / 0.6 )			2.5 A / 1,6 A	6.3 A / 2.5 A	20.0 A / 3.0 A	2.0 A / 1.6 A	3.5 A / 2.0 A	
switching cycles under rated current			10,000					
max. current under failure conditions at 250 V 50/60 Hz (power factor 0.95)			10.0 A	12.0 A	30.0 A	10.0 A	20.0 A	
switching cycles under max. current			300 600		300	1,000		
temperature rating T <sub>A</sub> ( steps in 5 °C )			(50) 70 °C 180 °C ¹)			80 °C 160 °C <sup>2)</sup>		
tolerances			Standard: ± 5 °K					
feature of automatic action			1.C.M, 2.C 2.B, 1.C, 3.C			1.B, 2.C		
contact resistance (incl. wire of 100 mm)			< 50 mΩ					
hysteresis			30 °K ± 15 °K <sup>3) 4)</sup>					
dielectric strength ( standard insulation )			2 kV					
vibration resistance (10 to 60 Hz)			$100\mathrm{m/s^2}$					
resistances to impregnation			tight against ordinary resins and lacquers					
degrees of protection provided by enclosures (EN 60529)			IP00					
suitable for use in protection category			1,11					
approvals	VDE / ENEC		EN 60730-1/-2-9					
	UL <b>R</b> 1°		UL 2111/UL 873 <sup>5)</sup> -					
	CSA/cUL c ?		C22.2 No. 77 / C22.2 No. 24 <sup>5)</sup> -					
	CQC		GB14536.1-1998 / GB14536.10-1996 <sup>5)</sup>					

 $<sup>^{1)}</sup>T_{A}\text{ up to 50°C on request} \quad ^{2)}\text{ approval to EN60730-2-2 up to 180°C} \quad ^{3)}\text{ with } \pm 3\text{ K tolerances and smaller hysteresis on request}$ 

The variety of our product variations is nearly infinite. Microtherm distinguishes itself by a high expert's know-how in the area of customised developments. We will be pleased to give you specific advice during a personal consultation and present you all the options suitable for your application:

- application of plug connectors
- unique packaging and overmolding variations
- specific cable assemblies and many more

 $<sup>^{4)}</sup>$  at the  $\rm T_{A}$  (upper and lower) limits the hysteresis could deviate  $\,^{-5)}$  on request
