### Description

Available in TO220AB-Insulated (ceramic insulated), the T1610T-8I series of Triac can be used in an on/off or phase angle control function in general purpose AC switching.

T1610T-8I can be directly driven through a microcontroller allowing usage of small capacitive or resistive power supplies.

Provides insulation rated at 2500 V rms (TO-220AB insulated package).
