### Description

Specifically designed to operate at 800 V and 150 °C, the **T1635H-8G** Triac housed in D<sup>2</sup>PAK provides an enhanced thermal management: this 16 A triac is the right choice for a compact drive of heavy AC loads and enables the heatsink size reduction.

Based on the ST Snubberless high temperature technology, it offers higher specified turn off commutation and noise immunity levels up to the  $T_j$  max.

The **T1635H-8G** safely optimizes the control of the hardest universal motors, heaters and inductive loads for industrial control and home appliances.
