

Tango 22A

Combo 2G/3G/4G WiFi & GPS Screw Mount Puck Antenna

Key Features

- 2G, 3G, 4G GPS & WiFi combined
- Low profile design
- Through hole mount
- Galileo GPS GLONASS Coverage

General Description

The Tango 22A combines 3 separate antennas into one compact and low profile package, capable of 2G, 3G, 4G WiFi & Global Positioning. Designed for users who want an 'all-in-one' solution rather than having to install three separate antennas.

The cellular antenna is quad band, so frequencies from 698 to 960Mhz and 1710 to 2700MHz are covered, allowing this antenna to be used worldwide for all cellular operators on 2G and 3G networks. 4G Networks are also covered for most regions.

The Tango 22A is commonly used with applications such as automotive tracking, vending machines, energy metering and many more.

The low profile design and screw mount base makes the Tango 22A suited to environments where it needs to be less noticeable.

Additional Considerations

- Combination design saves on cost and installation of additional antennas
- Ideal for more covert installation
- Meets all EU compliance criteria for electronic goods
- Best for 4G at 800MHz (Band 20)
