### **Switching Operation**

#### Teach in of output

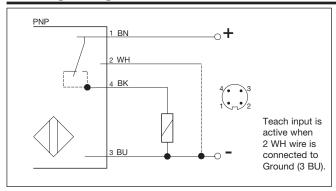

All these functions may be programmed/taught by means of the Teach-in input (pin 2) present in the connector. Each mode has a unique indication using the Echo, P1 and P2 LEDs. The programming/Teach-In procedure is shown in the following flow diagram:

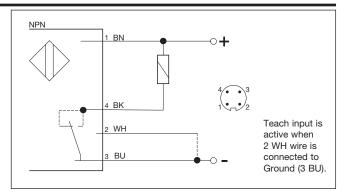

#### Normal function:

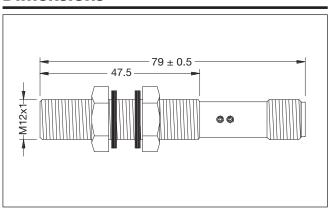

The Echo LED is ON when an echo is received (alignment LED). P1 LED is indicating status of the switching output.
