Product Description

A family of diffuse ultrasonic sensors in Stainless steel housing and with sensing range from 50-400 mm, 100-900 mm and 200-1500 with a resolution as low as 1.0 mm.

The sensor contains both an analogue and a digital output. The output is either 0-10V or 4-20 mA and the digital output NPN or PNP, NO

or NC which forms a window detection. The sensor is the ideal choice for distance measurement, level measurement, diameter measurement or loop control.

Due to use of microprocessor control the digital filtering makes the sensor immune to most electromagnetic interferences.
