Ultrasonic
Diffuse, Digital Output
Types UA18ESD......TI

CARLO GAVAZZI

- Cylindrical M18 stainless steel housing INOX AISI316L
- Sensing distance: 40-800 mm
- Power supply: 10-30 VDC
- Outputs: PNP or NPN, NO or NC
- Repeatability 0.5%
- Beam angle. ±7° or ±8°
- Protection: Short-circuit, reverse polarity and overvoltage
- Protection degree IP 67
- 2 m cable or M12 plug

Product Description

A self-contained multifunctional diffuse ultrasonic sensor with a sensing range of 40 to 300 mm and 80-800 mm. One switching output - easily set up for "windows" detection with two setpoints. NO or NC output is selectable. A sturdy stainless steel housing provides the perfect packaging for the sophisticated microprocessor controlled and digitally filtered sensor electronics. Excellent EMC performance and precision are typical features of this sensor on true distance measurement.

## Specifications (cont.)

Output current continuous (I_e) Max. load capacity 100 nF	≤ 100mA
Output current short-time (I) Max. load capacity 100 nF	≤ 100 mA
Minimum operational current (I_m)	≤ 0.5 mA
OFF-state current (I_r)	≤ 10 µA @ U_B max.
Voltage drop (U_d)	≤ 2.2 VDC @ I_e max.
Protection	Short-circuit, overvoltage and reverse polarity
Carrier frequency	300 kHz
Operating frequency (f) UA18ESD03... UA18ESD08...	≤ 8 Hz ≤ 5 Hz
Response time OFF-ON (t_{ON}) UA18ESD03... UA18ESD08...	≤ 60 mS ≤ 100 mS
Response time ON-OFF (t_{OFF}) UA18ESD03... UA18ESD08...	≤ 60 mS ≤ 100 mS
Power ON delay	≤ 100 mS
Output function, open collector By sensor type	NPN or PNP
Output switching function	One open collector transistor output to be configured as NO or NC
Indication Output ON Echo ON	Yellow LED Green LED
Environment Installation category	III (IEC 60664/60664A; 60947-1)
Pollution degree	3 (IEC 60664/60664A; 60947-1)
Degree of protection	IP67 (IEC 60529; 60947-1)

Ambient temperature Operating Storage	-20° to +60°C (-4° to +140°F) -35° to +70°C (-31° to +158°F)
Vibration	10 to 55 Hz, 1.0 mm/6g (IEC/EN 60068-2-6)
Shock	30 g / 11 mS, 3 directions (IEC/EN 60068-2-27)
Rated insulation voltage	< 500 VAC (rms)
Housing Material body Material front Material back, plug Material back, cable Material sealing front	AISI 316L stainless steel Epoxy-glass resin Grilamid Grilamid TPE
Connection Cable Plug	PVC, grey, 2 m, 4 x 0.32 mm², Ø = 4.7 mm M12, 4-pin (CON. 14-series)
Tightening torque	≤ 1 Nm
Weight incl. packaging Cable version Plug version	160 g 85 g
CE-marking	Yes
Approvals	cULus (UL508)

Programming set-up

Teach-in by wire adjustment options

In the following, **"*Activate Teach*"** means:
PNP – Connect the white wire to V+ (Brown wire)
NPN – Connect the white wire to GND (Blue wire)

Three Teach-in adjustment options are available:

1) Window Teach-in Option (adjustment of two points: P1 and P2)

Teach-in of set point P1:
*   Place the target at the selected far distance P1 - the green Echo LED is ON
*   *"Activate Teach"* shortly
*   Setpoint P1 has been stored and the sensor is still in teach mode
*   The orange LED will continue flashing rapidly with a frequency of 2 Hz until the setpoint P2 has been learned

Teach-in of set point P2:
*   Place the target at the selected close distance P2 - the green Echo LED is still ON
*   *"Activate Teach"* shortly
*   The green LED switch OFF and the orange LED will flash 5 times with a frequency of 2,5 Hz
*   Setpoint P2 has been stored.
*   The sensor is in normal mode and the green and yellow LEDs are steady.

2) Target adjustment on P1 only (Minimum P2 distance)

Teach-in of set point P1:
*   Place the target at the selected far distance P1 - the green Echo LED is ON
*   *"Activate Teach"* shortly
*   Setpoint P1 has been stored and the sensor is still in teach mode
*   The orange LED will continue flashing rapidly with a frequency of 2 Hz until setpoint P2 has been learned
*   Without moving the target
*   "Activate Teach" shortly
*   The green LED switches OFF and the orange LED will flash 5 times with a frequency of 2,5 Hz
*   Setpoint P2 has been stored at the minimum distance
*   The sensor is in normal mode and the green and yellow LEDs are steady

3) Full range teach (NPN and PNP versions only)
*   Remove the target in front of the sensor -the green Echo LED switches OFF
*   *"Activate Teach"* shortly
*   The orange LED will flash 5 times with a frequency of 2,5 Hz
*   Setpoint P1 has been stored at the maximum distance and P2 at the minimum distance
(this distance is not uniquely definite and repeatable throughout the different sensor types)
