

VIPer*6 family: *The fast lane to SMPS design*

The fast lane to design switch mode power supplies

VIPerPlus – high-voltage converter

Advanced controller with embedded 800 V power MOSFET

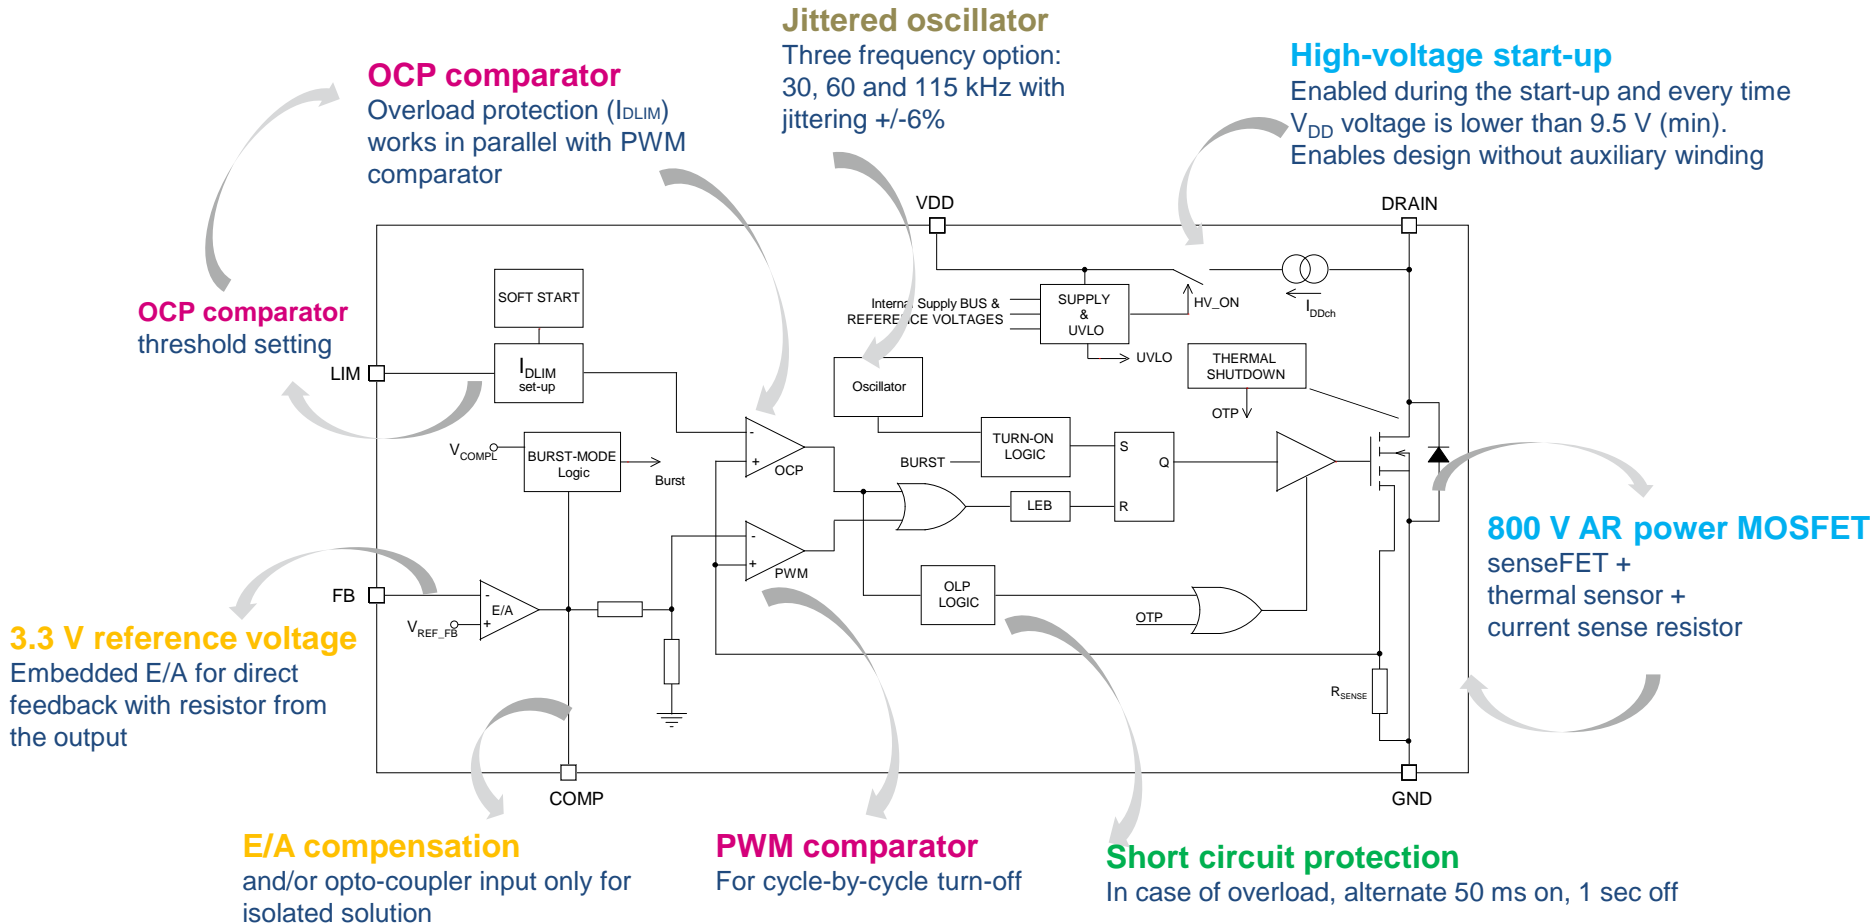

Robustness and reliability
800 V power MOSFET, thermal shutdown, soft start, OLP protection, auto-restart

Energy saving
Power consumption less than 30 mW at no load

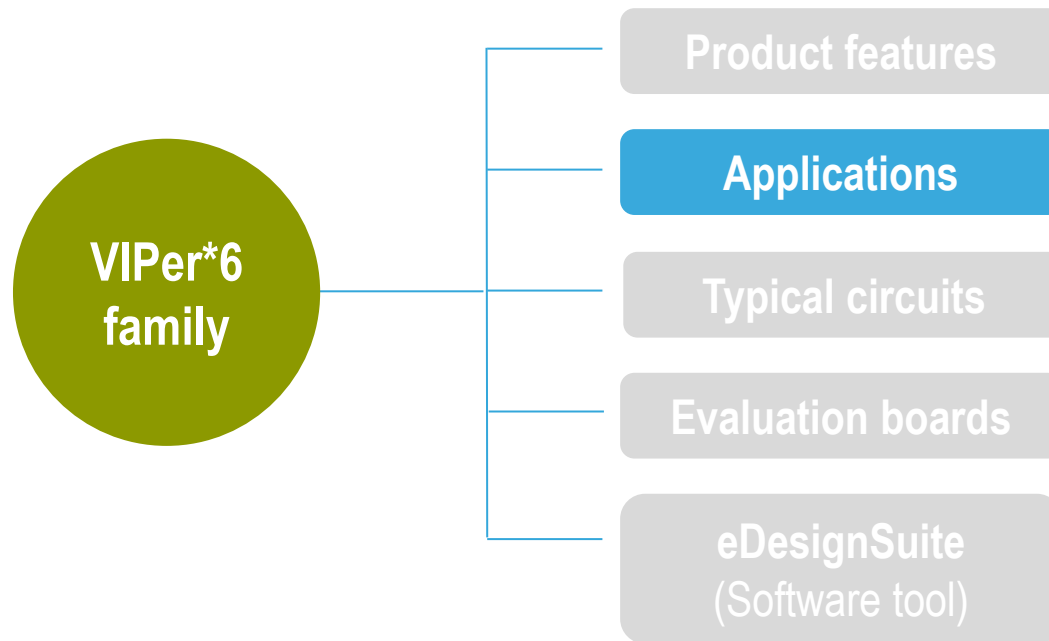

High integration
Direct feedback, jittering, HV start-up

Flexibility
Power scalability up to 12 W, no aux winding, clampless design, no CM EMC filter

VIPer*6 family: block diagram

VIPer*6 family	VIPer06	VIPer16	VIPerA16	VIPer26
P_{OUT} @ 85 to 265 Vac	4 W	6 W	6 W	12 W

VIPer*6 family

Fixed-frequency AC-DC converters

VIPer06, VIPer16, VIPerA16, VIPer26

Metering

Home
appliances

Home
automation

Lighting

Automotive

The best choice to power your microcontroller

VIPer*6 for metering

VIPer*6 in smart-energy meters

VIPer*6 based AC-DC auxiliary power supply for

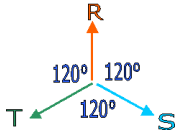

- microcontrollers
- transceivers
- metrology ICs

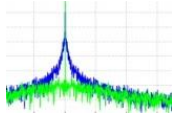

Aux SMPS market needs

Non-isolated solution for *single-phase meters*

Isolated solution for *3-phase meters*

Reduced noise in the communication band

Robustness

VIPer*6 key benefits and supported topologies

VIPer*6, key benefits for the application

- 30 kHz switching frequency to reduce noise in the communication band (only VIPer06)
- 800 V breakdown
- Op amp available for primary regulation

Inductor based topology
Buck

Flyback topology
Isolated with primary regulation

VIPer*6 for home appliances

VIPer*6 in home appliances

VIPer*6 based AC-DC auxiliary power supply for

- microcontrollers
- LEDs
- user interfaces
- motor driver ICs

Small home appliances

Major appliances

Aux SMPS market needs

Small EMI input filter

Power scalability

Clampless

High efficiency

Reduced size

Powering MCU to drive Triac

VIPer*6 key benefits and supported topologies

VIPer*6, key benefits for the application

- Frequency jittering
- VIPer*6 pin-to-pin compatible
- 800 V breakdown
- Self supply
- Op amp available for primary regulation or direct feedback

Inductor based topologies

Buck
common neutral

Buck-boost
negative output, common neutral

Smart flyback topologies

- Isolated
- primary regulation
 - secondary regulation

- Non-isolated direct feedback, positive/negative output, common neutral

VIPer*6 for home automation

VIPer*6 in home automation

VIPer*6 based AC-DC auxiliary power supply for

- microcontrollers
- transceivers
- sensors
- motor driver ICs

Aux SMPS market needs

Low standby power

Small EMI input filter

Reliability

Cost saving

Cap SMPS replacement

Powering MCU to drive Triac

VIPer*6 key benefits and supported topologies

VIPer*6, key benefits for the application

- 30 mW @ no load
- Frequency jittering
- 800 V breakdown
- Self supply
- Op amp available for direct feedback

Inductor based topology Buck

Smart flyback topologies
Non-isolated, direct feedback, positive/negative output, common neutral

VIPer*6 for lighting

VIPer*6 in street lighting

VIPer*6 based AC-DC auxiliary power supply for

- microcontrollers
- transceivers
- lighting driver ICs

Aux SMPS market needs

<p>Low standby power</p>	<p>Robustness</p>	<p>Cost saving</p>	<p>Reduced size</p>	<p>High efficiency</p>

VIPerA16 for automotive

VIPerA16
in automotive
hybrid/EV control

Aux SMPS
market needs

VIPerA16
Key benefits and
supported topologies

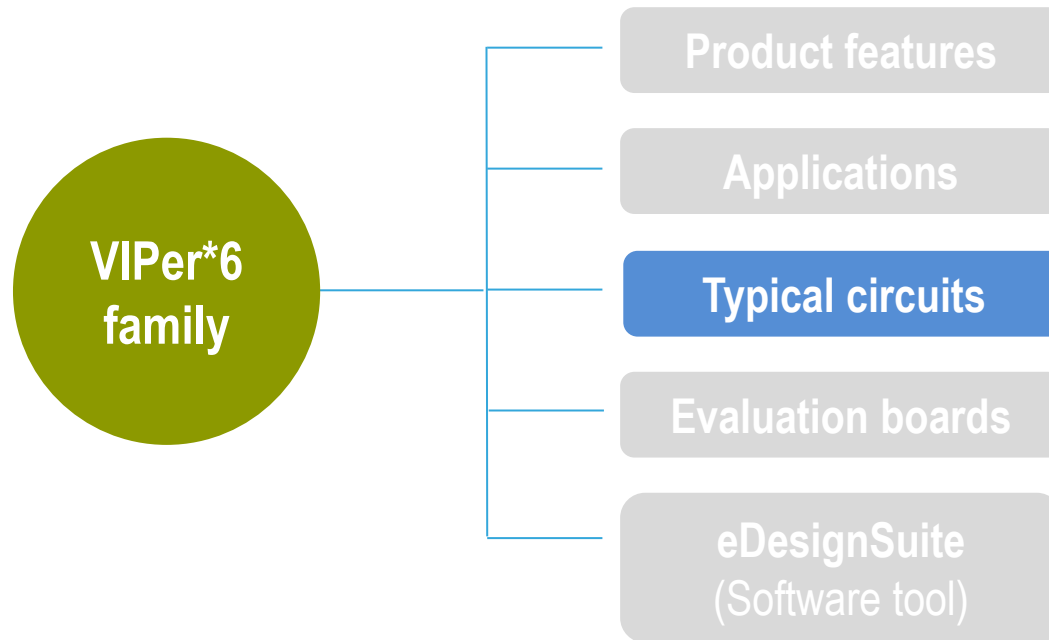

VIPerA16 – automotive grade 1, key benefits for the application

- AEQ100 compliant
- Operating temperature: -40 to +125 °C
- 800 V breakdown
- Op amp available for direct feedback

Smart flyback topologies

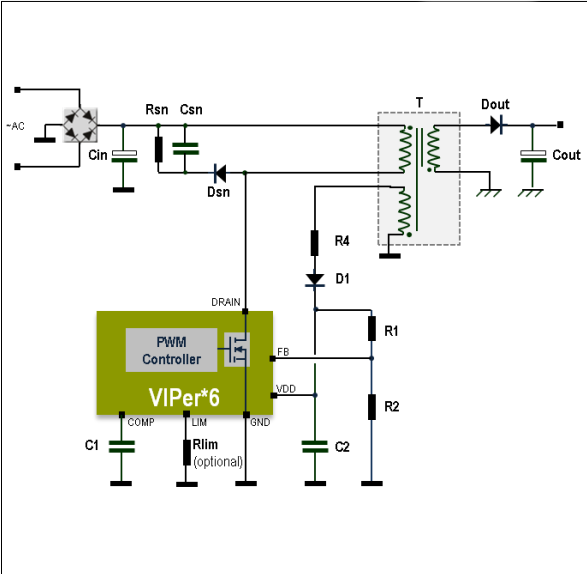

Contact your ST office for further information on VIPerA16

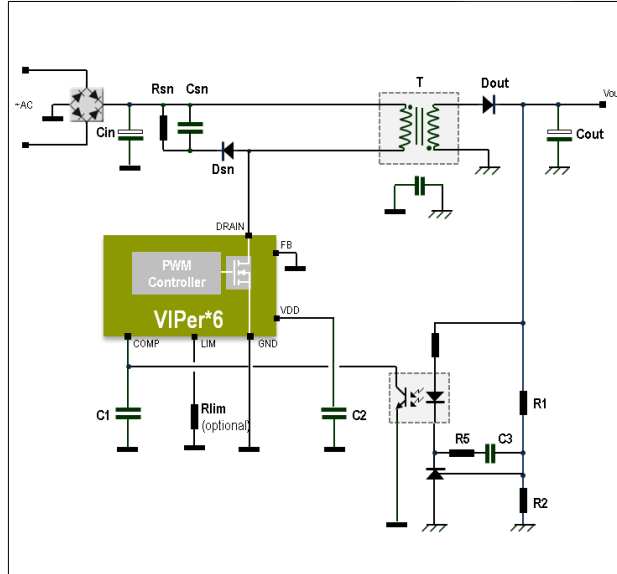

VIPer*6: isolated flyback

Primary regulation

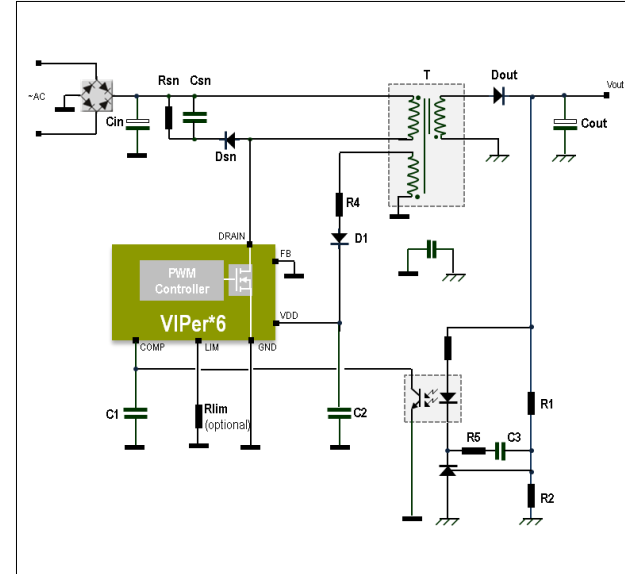

Perfect trade-off between isolation, cost and output regulation

Secondary regulation

Standard topology without aux winding (VIPer self supply)

Secondary regulation

Standard topology with the lowest standby consumption

Isolated auxiliary SMPS

VIPer*6: non-isolated flyback_(1/2)

Minimal component count

Minimal component count
with the lowest standby consumption
($V_{OUT} \geq 12\text{ V}$)

Non-isolated auxiliary SMPS

VIPer*6: non-isolated flyback_(2/2)

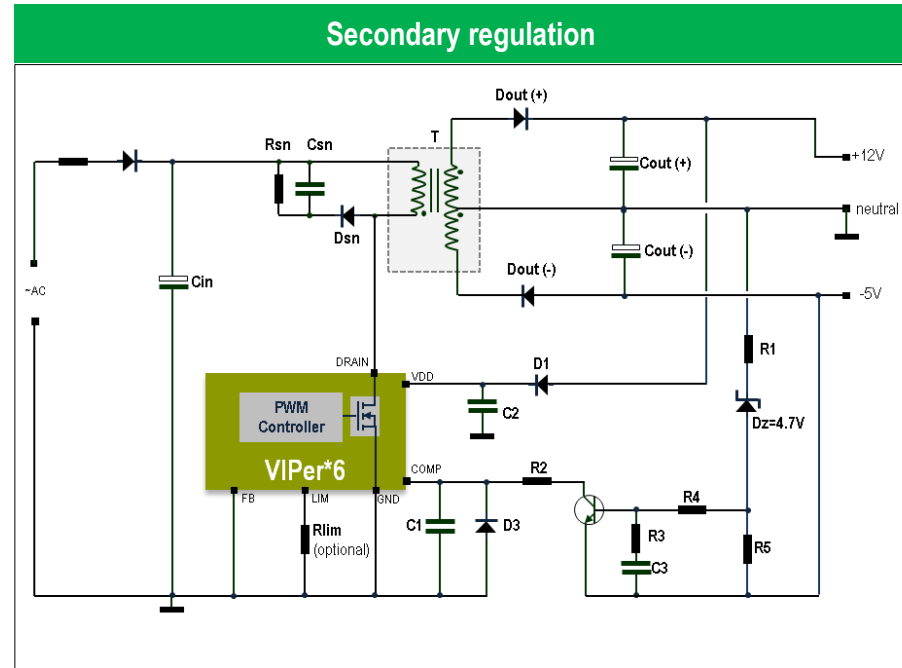

Configurations with positive and negative outputs

Direct feedback

+7 V and -5 V: outputs referred to neutral with lowest standby consumption

Secondary regulation

+12 V and -5 V: outputs referred to neutral with lowest standby consumption

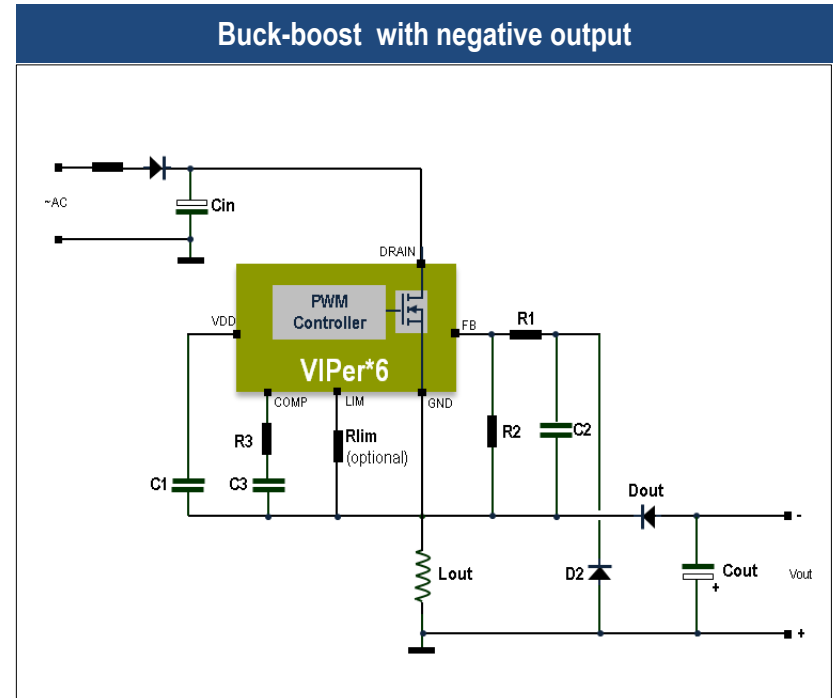

Non-isolated auxiliary SMPS

VIPer*6: inductor based topologies

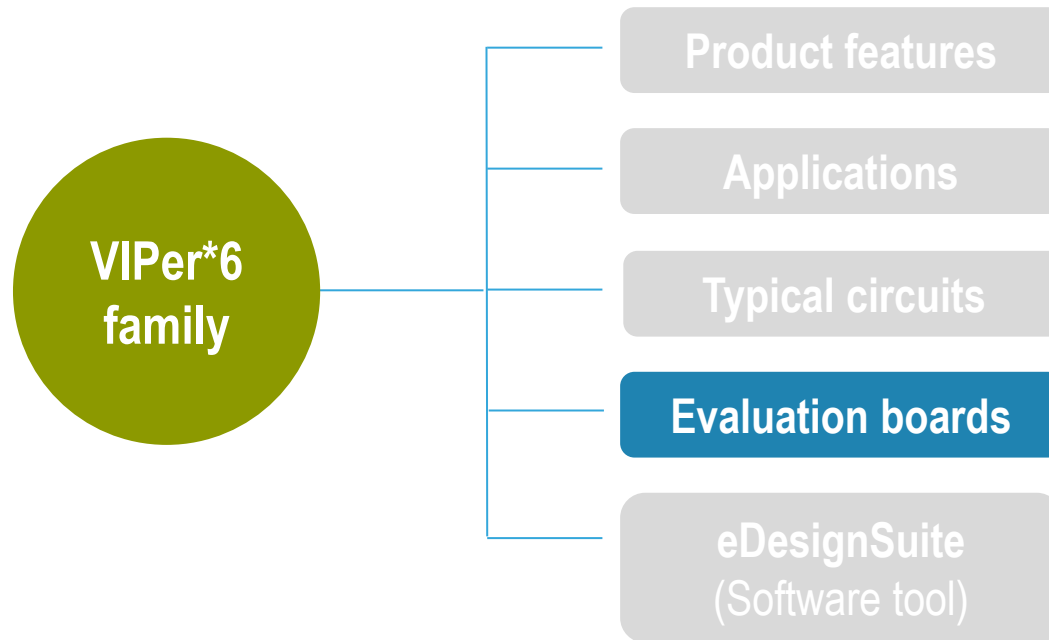

Simplicity and minimum size guaranteed

Powering an MCU to drive a Triac

Non-isolated auxiliary SMPS

STEVAL-ISA130V1 (*)

1.7 W buck converter
based on VIPer06X
(output referred to neutral)

- $V_{IN} = 90$ to 265 Vac
- $V_{OUT} = 12$ V
- $I_{OUT} = 140$ mA
- Efficiency = 82.6% @ 85 Vac (full load)

[DN0009](#)

STEVAL-ISA115V1 (*)

1.8 W buck converter
based on VIPer06XN
(output referred to neutral)

- $V_{IN} = 90$ to 265 Vac
- $V_{OUT} = 12$ V
- $I_{OUT} = 150$ mA

[AN4260 \(*\)](#)

STEVAL-ISA010V1

1.8 W super wide range
buck converter
based on VIPer16LN
(dual outputs referred to neutral)

- $V_{IN} = 85$ to 500 Vac
- $V_{OUT1} = 12$ V
- $V_{OUT2} = 5$ V
- $I_{OUTtot} = 150$ mA
- Standby= 96 mW @ 230 Vac

[AN2872](#)

STEVAL-ISA096V1

2 W buck-boost converter
based on VIPer06XS
(negative output referred to neutral)

- $V_{IN} = 85$ to 264 Vac
- $V_{OUT} = -12$ V
- $I_{OUT} = 150$ mA
- Efficiency = 80% @ 230 Vac (full load)
- Standby < 30 mW @ 264 Vac

[UM1470](#)

STEVAL-ISA071V2

4 W non-isolated flyback converter
based on VIPer16L
(direct feedback, dual outputs
referred to neutral)

- $V_{IN} = 85$ to 264 Vac
- $V_{OUT1} = +7$ V
- $I_{OUT1} = 160$ mA
- $V_{OUT2} = -5$ V
- $I_{OUT2} = 400$ mA
- Standby = 35 mW @ 230 Vac

UM0920

STEVAL-ISA117V1 (*)

4.2 W isolated flyback converter
based on VIPer16LN
(secondary regulation)

- $V_{IN} = 90$ to 265 Vac
- $V_{OUT} = 12$ V
- $I_{OUT} = 350$ mA

AN4259 (*)

STEVAL-ISA112V1

STEVAL-ISA113V1

4.2 W non-isolated flyback converter
based on VIPer06HN / VIPer06HS
(direct feedback)

- $V_{IN} = 90$ to 265 Vac
- $V_{OUT} = 12$ V
- $I_{OUT} = 350$ mA
- Efficiency 83% @ 115 V (full load)
- Standby < 28.5 mW @ 264 Vac

AN4116,
AN4164

STEVAL-ISA118V1

4.5 W non-isolated flyback converter
based on VIPer16LN
(direct feedback)

- $V_{IN} = 90$ to 265 Vac
- $V_{OUT} = 16$ V
- $I_{OUT} = 280$ mA
- Efficiency > 81% @ 230 Vac (full load)

AN3028

STEVAL-ISA116V1 (*)

5 W buck converter
based on VIPer26LD

- $V_{IN} = 85$ to 305 Vac
- $V_{OUT1} = 16$ V
- $V_{OUT2} = 5$ V
- $I_{OUT1} = 300$ mA
- $I_{OUT2} = 15$ mA

AN draft (*)

STEVAL-ISA110V1 (*)

STEVAL-ISA111V1
12 W non-isolated flyback converter
based on VIPer26LN
(direct feedback;
60 kHz, 115 kHz versions)

- $V_{IN} = 90$ to 265 Vac
- $V_{OUT} = 12$ V
- $I_{OUT} = 1$ A
- Average efficiency @ 115 Vac:
83.4% (115 kHz), 87% (60 kHz)

AN4106,
AN4165 (*)

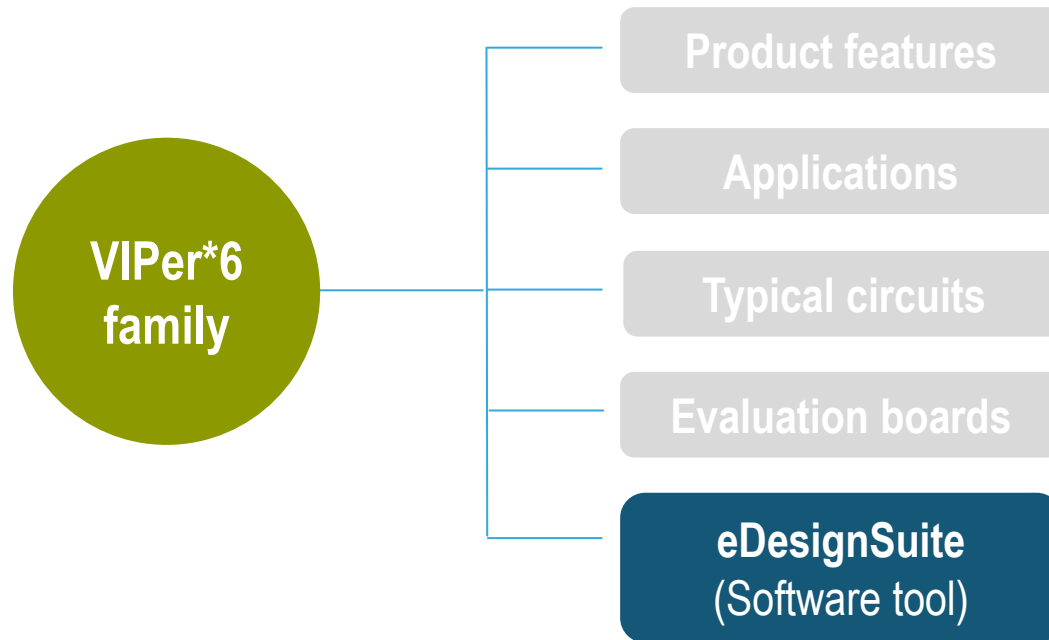

STEVAL-ISA081V1

12 W isolated flyback converter
based on VIPer16LND
(primary regulation)

- $V_{IN} = 85$ to 305 Vac
- $V_{OUT1} = 12$ V
- $V_{OUT2} = 3.3$ V
- $I_{OUT1} = 900$ mA
- $I_{OUT2} = 100$ mA
- Efficiency = 84% @ 230 Vac (full load)

UM0984

eDesignSuite enables VIPer*6 based design^(1/2)

eDesignSuite

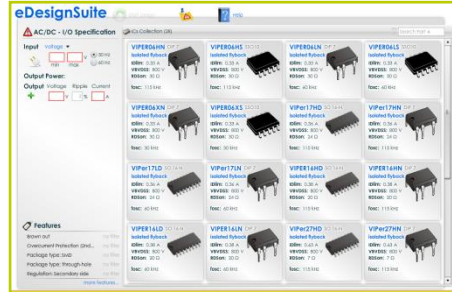

The smart tool to design your application

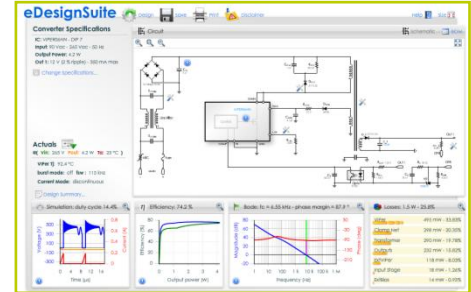

- Login to www.st.com/edesignsuite (online registering is required)
- or
- Fill in eDesignSuite widget (visit VIPer*6 product pages on www.st.com)
- or
- Open eDesignSuite offline version (ask your ST sales office to get it)

Choose Power Supply application type and create your design

Insert your I/O specifications and select one of the proposed VIPer*6

The design is ready

A complete design in a few steps
