- Excellent, even distribution for close range lighting applications
- Standard or touch models available
- Touch models can be actuated with bare hands or gloves via the integrated capacitive switch on the face of the model
- Flat-mount or 30 mm base-mount models available
- Cabled, quick-disconnect, and terminal connection models available
- Rugged, sealed polycarbonate housing rated to IEC IP65, IEC IP67, and IP69K
- Low-profile design with several mounting options
- 12 V DC to 30 V DC operation
- High lumen output and low power consumption at less than 3 watts
- Touch models are dimmable via the touch interface, and all models are dimmable via PWM <sup>2</sup> input on the control wire

For PWM dimming, use with the LC15T-127AP1RBGQP dimmer module. For more information, refer to the LC15T In-Line Touch Switch datasheet, p/n 217460.

## Models

Flat mount models include a 48 mm (1.9 in) circular velcro mounting kit for easy mounting with no additional hardware.

## Device Configuration

Device Interface	Function
 <b>Single Touch</b>	<p><b>ON/OFF</b></p> <p>A single touch in the off-state turns the device on. A single touch in the on-state turns the device off.</p>
 <b>Touch and Hold</b>	<p><b>Lumen Control</b></p> <p>Touch and hold to increase the Lumen Output from 10% to 100%. Continue to touch and hold to decrease the Lumen Output from 100% to 10%.</p>
 <b>Double Touch</b>	<p><b>100% ON</b></p> <p>Double touch to return to 100% Lumen Output.</p>

**Note:** The unit flashes at the maximum and the minimum state to notify user that the limit has been reached.

<sup>1</sup> Flex Arm Lights are available pre-assembled with integrated WL50 light for plug and play operation with available power supplies. Refer to the Flex Arm Light literature, p/n 222095, and PSW-24-1 Power Supply literature, p/n 214507.

<sup>2</sup> Pulse width modulation is a digital way to represent an analog value by varying the width of pulses at a constant frequency. The duty cycle (on-time versus off-time) is measured in percent from 1-100.

## Wiring

Diagram	Wire	Connection	Pinout (Male)	Pinout (Female)
	1 - Brown	12 V DC to 30 V DC	<p>1 = Brown 2 = White 3 = Blue 4 = Black</p>	<p>1 = Brown 2 = White 3 = Blue 4 = Black</p>
	2 - White	Not used		
	3 - Blue	DC common		
	4 - Black	Pulse width modulation (PWM) input. For maximum intensity, leave the black wire floating or connected to common. Connecting to 12 V DC to 30 V DC causes LEDs to shut off.
