

# TTM RF & Specialty Components Product & Technology Roadmap 2022

**Mark Bowyer**  
Director, Business Development –  
RF&S Business Unit  
[Mark.Bowyer@ttm.com](mailto:Mark.Bowyer@ttm.com)

RF & Specialty Components (RF&S)

June 2022

*Inspiring Innovation*

# TTM Corporate Overview

Aerospace & Defense/Specialty  
(A&D) Business Unit

Automotive & Medical,  
Industrial & Instrumentation  
(AMI&I) Business Unit

RF & Specialty Components  
(RF&S) Business Unit

Communications & Computing  
(C&C) Business Unit

- TTM Technologies is a \$2.1B PCB manufacturer with ~20,000 employees globally
- RF&S (Anaren acquisition) operates as a stand alone TTM business unit
- We have been a provider of integrated microwave technology for over 50 years
- **Over 1.85 Billion components shipped to date**
- RF&S has 200 employees with our headquarters in Syracuse, NY
- Our core strategy is to provide highly innovative engineered solutions that create a differentiated competitive advantage

## Main RF&S Engineering Locations

- BU Headquarter
- Engineering / R&D
- Customer Service
- Manufacturing of:
  - Xinger Products
  - Mini-Xinger

Syracuse, NY 40,000 sq. ft.

- Process Engineering
- Customer Service
- Manufacturing of:
  - Resistive Products
  - Ceramic Interposers

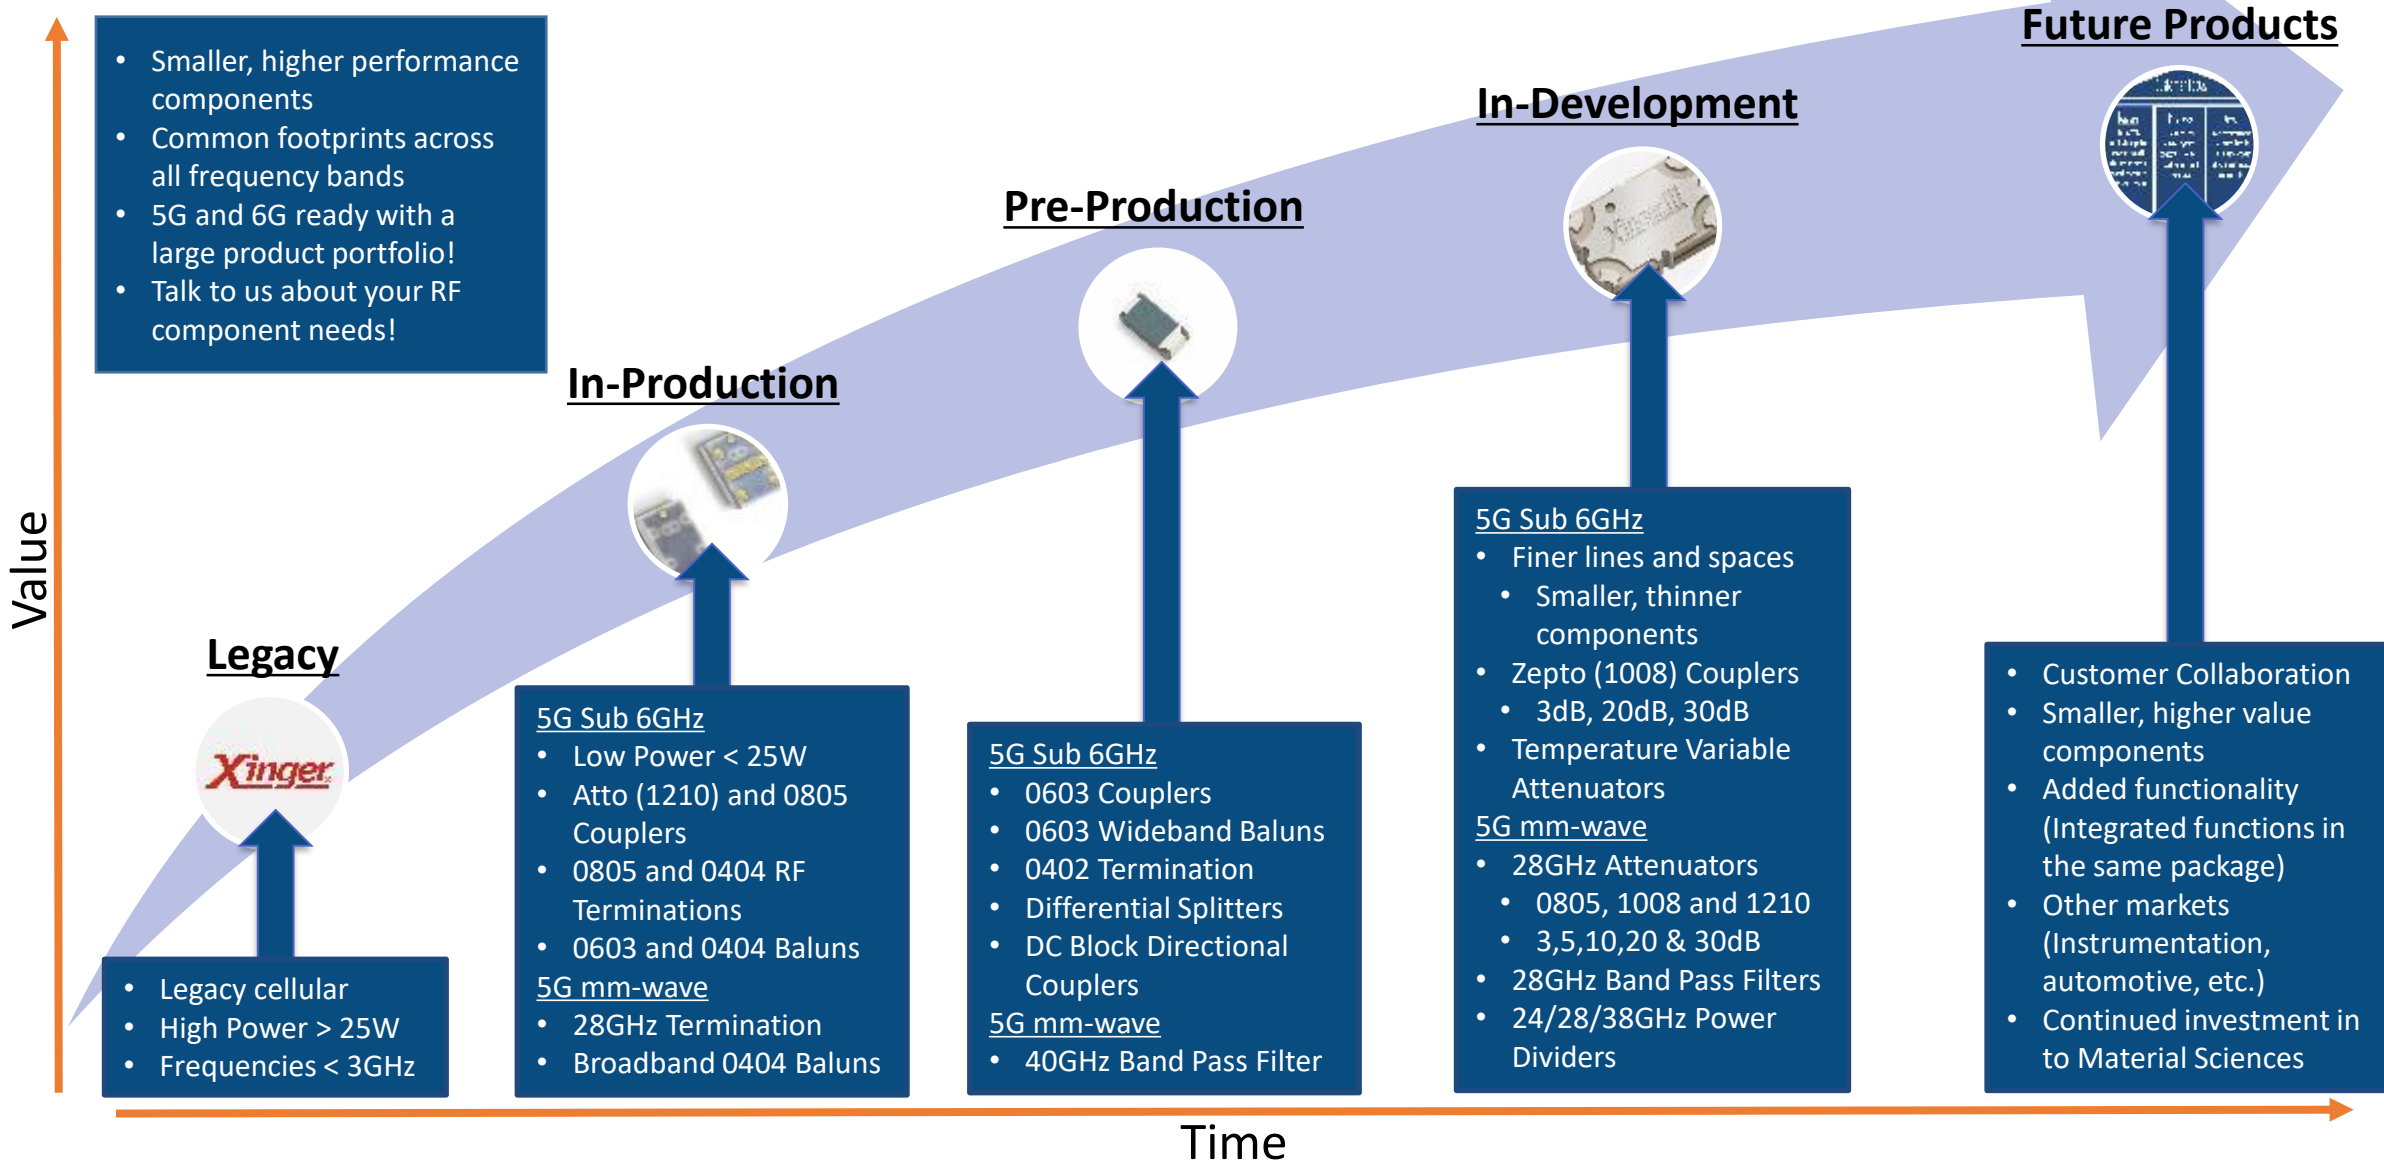

Suzhou, China 76,000 sq. ft.

*Inspiring Innovation*

## **Xinger<sup>®</sup> Standard Components – 5G sub-6GHz**

# TTM RF&S 5G Standard Products

# Xinger® Families

- Designed for **high reliability** and **high volume** RF Applications
- Available in **all narrow bands** 100-6000MHz
- Part families are **Foot print compatible** across frequencies

Hybrid Couplers

Balun Transformers

Terminations

Directional Couplers

Power Dividers

Attenuators

And many more...

# Xinger® Standard Components

- Product Line **Xinger®**
- Off-the-shelf standard components
  - Couplers (Directional and 3dB Hybrids)
  - Power Dividers
  - Balun Transformers
  - Terminations
  - Attenuators

To keep up with 5G (smaller, more channels, lower power radios), we continue to innovate towards smaller, higher performing components

A-SIZE  
14x10mm

E-SIZE  
14x5.1mm

Pico  
6.4x5.1mm

Femto  
3.2x5.1mm

Atto  
3.0x2.5mm

0805  
2.0x1.3mm

0603  
1.5 x 0.75mm

0404  
1.0 x 1.0mm

# NEW Wideband 0603 Balun Family

Frequency (MHz)	50 to 50	50 to 100	50 to 200
600-2500	X4B10L1-5050G	X4BD10L1-50100G	X4BD10L1-50200G
1200-2700	X4B20L1-5050G	X4BD20L1-50100G	X4BD20L1-50200G
2300-6000	X4B40L1-5050G	X4BD40L1-50100G	X4BD40L1-50200G
3000-6000	X4BD40L1-5050G

# mm-Wave High Power Termination 24 – 30GHz

Samples available

## Mechanical Outline

## Simulated Performance

## Electrical Specifications

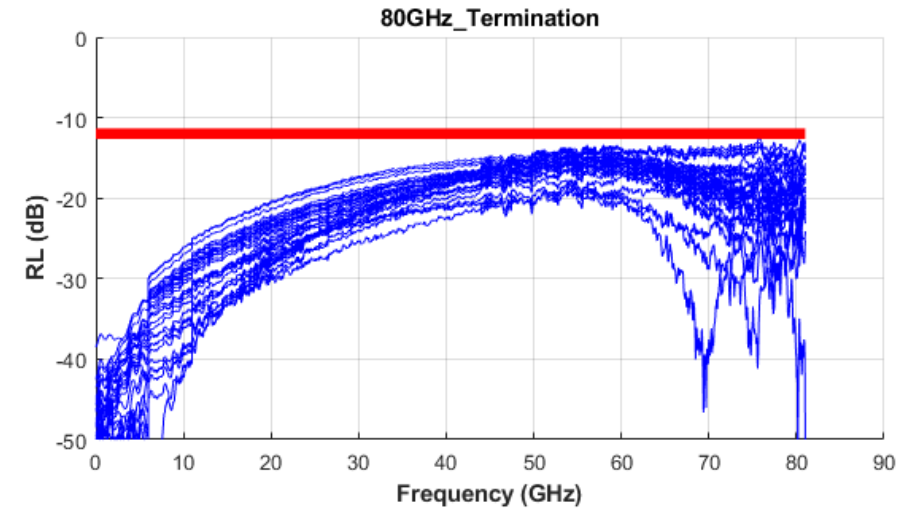

Impedance:	50 Ohms
Power:	5 Watts
Return Loss	>18 dB (24 – 26GHz)
	>20 dB (26 – 30GHz)

Please contact Mark Bowyer with any questions; mark.bowyer@ttm.com

# mm-Wave Termination DC – 81GHz

Please contact Mark Bowyer with any questions; mark.bowyer@ttm.com

Dimensions are in inches [millimeters]

Typical return loss from DC to 81GHz (Red Spec line is at 12dB)

Test Board is 5mil RO3003

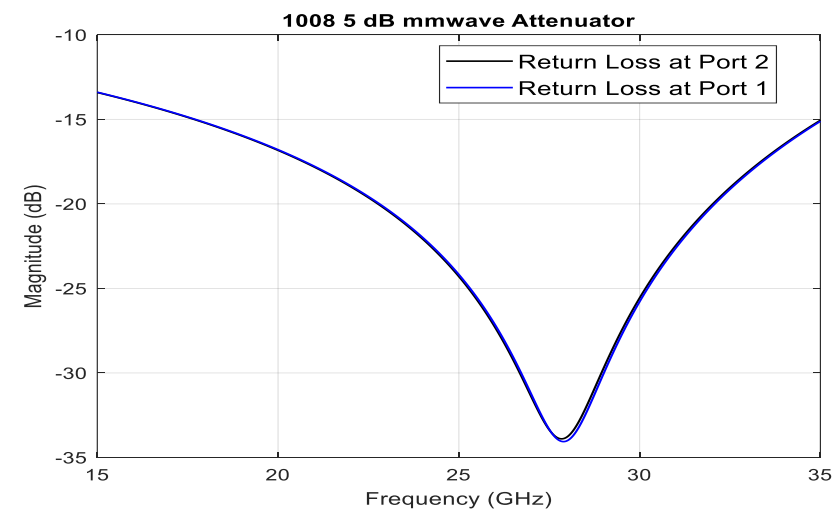

Hashed area show mounting footprint

# mmWave Attenuators

Samples available

- Packages: 0805, 1008
- Frequency Band(s):
  - 1008 (24 – 30GHz)
  - 0805 (37 – 40GHz)
- Attenuation:
  - 5dB (In Development – Samples available)
  - 1dB, 3dB, 10dB (In Design)
- Power Handling: 1W

Please contact Mark Bowyer with any questions; mark.bowyer@ttm.com

*Inspiring Innovation*

## **New Technologies - Engineered Thermal Solutions (ETS)**

# ETS Process

- ETS Engineered Thermal Features
  - TTM has develop a patent pending process that allows for solid copper plated cavities
  - 100% copper fill to replicate a copper coin
  - Superior grounding integrity for higher reliability and repeatability
  - Weight reduction achieved by using selective ETS
  - Standard and T-shape structures (replicating T-shaped coins) can be realized
  - Easily replaces via farm and coins in existing designs

Traditional Via Farm cross-section

Standard Coin cross-section

ETS cross-section

# ETS Key Thermal Improvements

- ETS can be applied in 2 ways
  - 1:1 direct coin replacement (not cost effective)
  - **Selective improvement to specific thermal areas**
- Selective ETS can be very small and more flexible versus standard coins
  - Smallest ETS area – 0.015" x 0.030" (0.38 x 0.76mm)
  - As a reference, Coin Size in the image below – 0.24" square (6.1mm)
- Selective ETS greatly improved PCB space utilization
  - ETS requires only 30% space required for direct coin replacement (For this application)
  - Helps to reduce design size, layer count and mass

ETS can be designed in unique shapes
