

Description

The Z00607 is suitable for low power AC switching applications. Typical applications include home appliances (electrovalve, pump, door lock, small lamp control), fan speed controllers,...

Thanks to the low gate triggering current these triacs can be driven directly by microcontrollers.

Features

- On-state rms current = 0.8 A
- Repetitive peak off-state voltage = 600 V
- Gate triggering current = 5 mA
