**Warning: DO NOT USE IN LIFE SUPPORT**

### **LIFE SUPPORT POLICY**

ZILOG'S PRODUCTS ARE NOT AUTHORIZED FOR USE AS CRITICAL COMPONENTS IN LIFE SUPPORT DEVICES OR SYSTEMS WITHOUT THE EXPRESS PRIOR WRITTEN APPROVAL OF THE PRESIDENT AND GENERAL COUNSEL OF ZILOG CORPORATION.

### **As used herein**

Life support devices or systems are devices which (a) are intended for surgical implant into the body, or (b) support or sustain life and whose failure to perform when properly used in accordance with instructions for use provided in the labeling can be reasonably expected to result in a significant injury to the user. A critical component is any component in a life support device or system whose failure to perform can be reasonably expected to cause the failure of the life support device or system or to affect its safety or effectiveness.

## Overview

Zilog's Passive Infrared (PIR) sensors are designed to deliver high performance and excellent EMI immunity for the most demanding motion detection applications.

The ZFG223611 PIR sensor is used in combination with a PIR lens and consists of two sensing elements behind a spectral filter window tuned to 8-13um wavelength to help block out unwanted IR energy sources.

The element spacing and shape improves immunity to white light and temperature changes.

## Features

- Dual-element balanced differential (series opposed) PIR sensor
- High PSRR
- Built in EMI compensation
- White Light Protection
- Elements are 0.75mm x 2.3mm spaced 0.6mm apart
- Standard metal TO-5 package
- Recommended operating voltage range of 1V to 15V
- Operating temperature range of -40°C to +70°C

## Applications

- Security Motion Detector
- Outdoor Lighting
- Video Doorbell
- IP Camera

## Ordering Information

Part Number	Description
ZFG223611	Dual-Element Pyroelectric Sensor

## Electrical Characteristics

- |   |  |
|---|--|
| 1) Signal output:                       | Min. 2.5 V <sub>P-P</sub> (Typ. 3.5 V <sub>P-P</sub> )         |
| 2) Noise output:                        | Max. 250 mV <sub>P-P</sub> (Typ. 90 mV <sub>P-P</sub> )        |
| 3) Balance output:                      | Max. 15%   |
|   | $B_o = [SA-SB / SA+SB] \times 100$                             |
|   | Bo: Balance output   |
|   | SA: Absolute signal output on Element A                        |
|   | SB: Absolute signal output on Element B                        |
| 4) Source voltage:                      | 0.3 V to 1.4 V (V <sub>d</sub> : 5V, R <sub>s</sub> : 47K ohm) |
| 5) Operating voltage (V <sub>d</sub> ): | 1 V to 15 V (R <sub>s</sub> : 47K ohm)                         |

### Notes:

Test set-up block diagram see Figure 1 and Figure 2.  
Test circuit configuration see Figure 3.  
Items 1,2 ,3 and 4 are 100% tested.

## Optical Characteristics

- |                           |  |
|---------------------------|--|
| 1) Typical field of view: | 145 degrees from center of element on axis X<br>136 degrees from center of element on axis Y<br>(See Figure 4) |
| 2) Filter substrate:      | Silicon  |
| 3) Cut on (5%T ABS):      | 5.0 ±1.0 micron  |
| 4) Transmissivity:        | ≥70% average 8 to 13 micron  |

## Environmental Characteristics

- |                           |                          |
|---------------------------|--------------------------|
| 1) Operating temperature: | -40°C to +70°C           |
| 2) Storage temperature:   | -40°C to +80°C           |
| 3) Operating humidity:    | 95% RH or less (at 30°C) |
| 4) Storage humidity:      | 95% RH or less (at 30°C) |

## RoHS Compliance

This product conforms to the RoHS Directive in force at the date of issuance of this Product Specification.

## Test Conditions

The figures below show the configuration under which the PIR sensor electrical characteristics are tested.

**Figure 1 - Test Set-up Configuration**

**Figure 2 - Occluder Position**

**Figure 3 - Test Circuit Configuration**

Measurement Amp. Characteristics:

Type: Non-inverting; Gain: 72.5 dB at 1 Hz; Bandwidth: 0.4 to 2.7 Hz / -3 dB

## Field of View

The typical field of view of the ZFG223611 PIR sensor is shown in Figure 4.

**Figure 4 - Field of View**

## PIR Sensor Circuit Diagram

The ZFG223611 circuit diagram is shown in Figure 5.

**Figure 5 - Circuit Diagram**

## Mechanical Dimensions

The dimensions of the ZFG223611 PIR sensor is shown in the following figures. All dimensions are  $\pm 0.2\text{mm}$  unless otherwise stated.

**Figure 6 - Top View**

**Figure 7 - Bottom View**

1: Drain  
2: Source  
3: GND

**Figure 8 - Side View**

## Device Markings

Lot number information is marked on the top surface of the PIR sensor.

Example: 0 26 B

**Figure 9 - Device Markings**

## Packaging

The ZFG223611 PIR sensor is shipped in sheets of 200 pieces, packed in boxes as shown in Figure 10 through Figure 12. The sheets are packed in an inner-box (2 sheets/box = 400 pieces) and 15 inner-boxes are packed in an outer-box for a total of 6,000 pieces per box.

### Sheet and Inner-Box Packaging

- 1) Standard sheet quantity: 200 pieces
- 2) Standard inner-box quantity: 2 Sheets (400 pieces)

**Figure 10 – Sheet & Inner-Box Packaging**

3) Standard Box Quantity: 6,000 pieces (15 Inner-Boxes)

**Figure 11 – Outer-Box Packaging**

4) The Standard Outer-Box dimensions are shown in Figure 12

**Figure 12 - Standard Outer-Box Dimensions**

## Usage Restrictions and Precautions

This section presents restrictions and precautions that apply to Zilog pyroelectric sensors.

### Design Restrictions and Precautions

This sensor is designed for indoor purposes in which secondary accidents due to operation failure or malfunctions can be anticipated; therefore, add appropriate fail-safe functionality to your design. If these sensors are intended for outdoor applications, be sure to apply suitable supplementary optical filters and use a waterproof enclosure.

### Usage Restrictions and Precautions

To prevent sensor malfunctions, operational failure, or any deterioration of their characteristics, do not operate these PIR sensors under the following, or similar, conditions:

- Rapid environmental temperature changes
- Strong shocks or vibrations
- In places where there are obstructing materials (glass, fog, etc.) through which infrared rays cannot pass within the detection area
- In fluids, corrosive gases, and sea breezes
- Under continual high-humidity atmospheric conditions
- Exposed to direct sunlight or automobile headlights
- Exposed to directly to forced-air currents from a heater or air conditioner

### Handling and Storage Restrictions and Precautions

To prevent sensor malfunctions, operational failure, appearance damage, or any deterioration of their characteristics, do not expose these sensors to the following, or similar, handling and storage conditions:

- Vibrations over extended periods
- Strong shocks
- Static electricity or strong electromagnetic waves
- High temperature and humidity over extended periods
- Corrosive gases or sea breezes
- Dirty and dusty environments that may contaminate the optical window
